These general considerations on the role of electronic waste in the development of the country are in keeping with the findings of the authors' previous studies on the management of electronic waste in the Dominican Republic. The authors have also found that the management of electronic waste is a complex task that requires the participation of all stakeholders in the country, including the government, the private sector, and the community.

Abstract ■ *Background:* The purpose of this study was to determine the prevalence of self-reported depression among a sample of U.S. adults and to examine the association between self-reported depression and self-reported health status, functional status, and quality of life. *Methods:* Data were obtained from the 2002 National Health and Medical Examination Survey, a nationally representative survey of the U.S. adult population. *Results:* The prevalence of self-reported depression was 10.3% among U.S. adults. Self-reported depression was associated with poor self-reported health status, poor functional status, and poor quality of life. *Conclusions:* Self-reported depression is a common condition among U.S. adults and is associated with poor self-reported health status, poor functional status, and poor quality of life.
