How We Teach Science John L. Rudolph, 2019-06-01 Despite an enduring belief that science should be taught there has

been no enduring consensus about how or why This is especially true when it comes to teaching scientific process John Rudolph shows that how we think about and teach science will either sustain or thwart future innovation and determine how science is perceived by the public *African American Doctors of World War I* W. Douglas Fisher, Joann H. Buckley, 2015-11-27

In World War I 104 African American doctors joined the United States Army to care for the 40 000 men of the 92nd and 93rd Divisions the Army's only black combat units The infantry regiments of the 93rd arrived first and were turned over to the French to fill gaps in their decimated lines The 92nd Division came later and fought alongside other American units Some of those doctors rose to prominence others died young or later succumbed to the economic and social challenges of the times Beginning with their assignment to the Medical Officers Training Camp at Des Moines the only one in U S history this book covers the early years education and war experiences of these physicians as well as their careers in the black communities of early 20th century America The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people
