Lesh,Susan J. assessment of higher order understandings and processes in foundation level pre high school mathematics Discussions focused on such issues as the purposes of assessment guidelines for producing and scoring real life assessment activities and the meanings of such terms as deeper and higher order understanding cognitive objectives and authentic mathematical activities Assessment was viewed as a critical component of complex dynamic and continually adapting educational systems During the time that the chapters in this book were being written sweeping changes in mathematics education were being initiated in response to powerful recent advances in technology cognitive psychology and mathematics as well as to numerous public demands for educational reform These changes have already resulted in significant reappraisals of what it means to understand mathematics of the nature of mathematics teaching and learning and of the real life situations in which mathematics is useful The challenge was to pursue assessment related initiatives that are systematically valid in the sense that they work to complement and enhance other improvements in the educational system rather than act as an impediment to badly needed curriculum reforms To address these issues most chapters in this book focus on clarifying and articulating the goals of assessment and instruction and they stress the content of assessment above its mode of delivery Computer or portfolio based assessments are interpreted as means to ends not as ends in themselves Assessment is conceived as an ongoing documentation process seamless with instruction whose quality hinges upon its ability to provide complete and appropriate information as needed to inform priorities in instructional decision making This book tackles some of the most complicated issues related to assessment and it offers fresh perspectives from leaders in the field with the hope that the ultimate consumer in the instruction assessment enterprise the individual student will reclaim his or her potential for self directed mathematics learning

Kane,2012-12-06 This volume explores the recent national trend toward adoption of performance assessments Embraced at all levels of educational decision making state district school and teacher the shapes these assessments take and the affects they have at the classroom level can differ significantly from one setting to another Based on case studies of 16 schools this study describes what performance assessments actually look like the types of tasks they

pose to children the scoring methods used the purposes to which they are put and how they fit in with other components of assessment systems It also shows how they differ when they are introduced by state departments of education districts and schools themselves Factors that affect policymakers and educators abilities to successfully design and introduce performance assessments are also explored These include the purposeful coordination of performance assessment with related education reforms such as the adoption of content and student performance standards and the professional development for teachers necessary to the successful implementation of performance assessments Barriers to adoption most notably the challenges of developing a technically sound performance assessment are discussed as well Crucial to teachers ability to appropriate performance assessments for use in their own classrooms is their involvement in designing and implementing them Although it would be impossible for a state or school district to involve all teachers in the design of a performance assessment they can take steps to foster teachers understanding of the purposes and methods of the assessment thereby supporting their ability to use similar methods in their daily teaching Toward that end this book describes the experiences of teachers and students with a range of assessments that all fall under the umbrella of performance assessment In addition it provides rich illustrations of those experiences across a diverse group of schools descriptions of the trade offs inherent in developing a student assessment system demonstrations of why no single assessment can be all things to all people and valuable insights for teachers administrators policymakers and researchers who want to improve their understanding of how performance assessments work in practice and how they may best serve to improve teaching and learning
