*Not Chance* Karin Hess,2023-01-18 A practical and systematic approach to deepening student engagement promoting a  
growth mindset and building a classroom culture that truly supports thinking and learning Every student deserves access to  
deep and rigorous learning Still some persistent myths about rigor can get in the way such as the belief that it means more  
or harder work for everyone rather than challenging and advancing students thinking So how can teachers get more clarity  
on rigor and foster more meaningful learning in their classrooms In *Rigor by Design Not Chance* veteran educator Karin Hess  
offers not only a clear vision of what makes learning deep and rigorous but also a systematic and equitable approach for  
engaging students of all ages in rich learning tasks To that end she outlines five essential teacher moves that foster thinking  
and learning 1 Ask a series of probing questions of increasing complexity 2 Build schemas in each content area 3 Consider  
ways to strategically scaffold learning 4 Design complex tasks that emphasize transfer and evidence based solutions 5  
Engage students in metacognition and reflection throughout the learning process From there Hess details how to create an  
actionable assessment cycle that will drive learning forward in any classroom This book offers a treasure trove of strategies  
student look for behaviors and templates to guide teachers in their work as well as an array of rich performance based  
assessments to engage and challenge students School leaders and instructional coaches can also benefit from the variety of  
teacher friendly supports to foster rigorous learning in their schools Ultimately *Rigor by Design Not Chance* helps educators

community and Interactive Learning Environments were initially developed Technology is smaller more mobile networked  
pervasive and often ubiquitous as well as being provided by the standard desktop PC This creates the potential for  
technology supported learning wherever and whenever learners need and want it However in order to take advantage of this

potential for greater flexibility we need to understand and model learners and the contexts with which they interact in a manner that enables us to design, deploy and evaluate technology to most effectively support learning across multiple locations, subjects and times. The AIED community has much to contribute to this endeavour.
