

# History Grade 8 Term 4 Summary

## Reasons why World War I broke out

**manufacturing** – making products from raw materials  
**rivals** – enemies

**Kaiser** – the word for a king in Germany

## Unit 1: Overview of long-term causes: Nationalism, industrial economies, control of seas, colonisation and empires

- There were four main long-term causes which led to the outbreak of World War I in 1914.
- These causes included nationalism, the growth of industrial economies, and control of seas, European colonisation and the growth of European empires.
- **Nationalism**
  - By the end of the 19th century, European countries were competing to be the richest, most powerful and strongest European nation.
  - This pride and devotion to one's country is called nationalism.
- **Industrial economies**
  - Britain was the first country to become industrialised in the 19th century
  - But Germany had begun to catch up and was producing iron, steel, coal and cars.
  - By the beginning of the 20th century, Britain no longer had the economic lead in Europe.
- **Control of the seas**
  - Tension had been building up in Europe for many years.
  - The main enemies or rivals were Britain and Germany.
  - To build and keep a big empire, Britain and Germany had to have powerful navies.
  - Britain had the strongest navy in the world.
  - It used the navy to protect its coastline, its large overseas empire and its trade routes across the world.
  - To challenge British control of the seas, the German Kaiser said he was going to build a great navy that could rival the British navy.
  - In response to this, Britain made a formidable new warship called a Dreadnought, which radically changed and improved their power at sea.
  - The Dreadnought had an armoured deck, with fast-firing, heavy guns.
  - Germany responded by trying to build even more superior warships.
  - This was the beginning of the 'naval race,' in which both sides tried to build better and bigger warships.
