*Lesson Plans for a Strong Start* Christine M. Snyder, 2016-03-01      **The SAGE Encyclopedia of Contemporary Early Childhood Education** Donna Couchenour, J. Kent Chrisman, 2016-03-15

The general public often views early childhood education as either simply babysitting or as preparation for later learning. Of course both viewpoints are simplistic. Deep understanding of child development, best educational practices based on development, emergent curriculum, cultural competence, and applications of family systems are necessary for high quality early education. Highly effective early childhood education is rare in that it requires collaboration and transitions among a variety of systems for children from birth through eight years of age. The SAGE Encyclopedia of Contemporary Early Childhood Education presents in three comprehensive volumes advanced research, accurate practical applications of research, historical foundations, and key facts from the field of contemporary early childhood education. Through approximately 425 entries, this work includes all areas of child development: physical, cognitive, language, social, emotional, aesthetic, as well as a comprehensive review of best educational practices with young children, effective preparation for early childhood professionals, and policy making practices, and addresses such questions as: How is the field of early childhood education defined? What are the roots of this field of study? How is the history of early childhood education similar to yet different from the study of public education? What are the major influences on understandings of best practices in early childhood education?

*The Comprehensive Infant Curriculum* Kay Albrecht, Kay M. Albrecht, Linda G. Miller, 2000

Based on the view that curricula for young children should involve thinking and planning for everything that can contribute to child development and the teacher's relationship with the child and the family, this book details a comprehensive interactive curriculum for infants from birth to 18 months. Following an introductory chapter presenting the curriculum model, Chapters 2 through 7 each address a major developmental challenge: separating from parents, connecting with school and teacher, relating to self and others, communicating with others, moving around, and expressing feelings. Within each chapter, the book presents innovations in 1) observation assessment including suggestions for ensuring developmentally appropriate practice and giving feedback to parents about developmental growth; 2) child development explaining the underlying theory of principles or content knowledge; 3) interactive experiences listing the types of experiences that teachers must observe, plan, support, and provide; 4) teaching including the teacher's role in supporting parents' suggestions for self-evaluation and suggested readings; 5) parent partnerships giving examples of school-initiated possibility and parent participation possibility; 6) environments focusing on providing an environment to meet infants' unique needs; and 7) related curriculum activities plans called Possibilities Plans including a concept web, concepts learned, and suggested resources. Activities are included in the following areas: dramatic arts, sensory arts, curiosity, literacy, music, movement, outdoor projects, and parent participation. Contains approximately 150 references.
