Answer **all** questions in this section

1. At the end of a football league season, the numbers of goals scored by 26 teams in the local league were as follows.

22	23	23	23	24	24	25	26	27	28	28	29	30
31	33	33	34	34	35	35	36	36	37	46	49	49

- Calculate the mean and variance of these data. [3 marks]
 - Find the median and interquartile range. [4 marks]
 - Draw a boxplot to represent the data. [3 marks]
2. There are 20 teachers and 15 lecturers attending a conference. The number of women teachers and that of women lecturers are 12 and 5 respectively. Four participants from this group are selected randomly to lead some sessions of outdoor activities.
- Find the probability that three teachers are selected. [2 marks]
 - Given that two women are selected, find the probability that both of them are teachers. [2 marks]
3. A continuous random variable, X , has probability density function

$$f(x) = \begin{cases} \frac{1}{72}(8x - x^2) & 2 \leq x \leq 8, \\ 0 & \text{otherwise} \end{cases}$$

- Find $F(x)$, the cumulative distribution function of X . [3 marks]
 - Sketch $F(x)$. [2 marks]
 - The median of X is m . Verify that $m \approx 4.42$. [3 marks]
4. A survey conducted in a school found that 136 out of 400 students like Mathematics.
- Find the unbiased estimates of the proportion of students who like Mathematics in the school. Explain why an interval estimate is more informative than a point estimate. [2 marks]
 - A random sample of n students is chosen from the school. If the 95% symmetric confidence interval for the proportion of students who like Mathematics in the school is (0.445, 0.235), find the value of n . [5 marks]
5. Over a long period of time, 20% of all vases made by a particular factory are imperfect and cannot be sold. Find the probability that fewer than 4 vases from a random sample of 10 made by the factory are imperfect. [2 marks]

The factory introduces a new machine for producing vases. To test whether there has been an improvement, each of a random sample of 20 vases made by the new machine is examined. From this sample, 2 vases are found to be imperfect.

Show that this does not provide evidence, at the 5% level of significance, of a reduction in the proportion of imperfect vases. You should show your hypotheses and calculations clearly. [6 marks]

Free Justice Sara Mayeux, 2020-04-28 Every day in courtrooms around the United States thousands of criminal defendants are represented by public defenders lawyers provided by the government for those who cannot afford private counsel Though often taken for granted the modern American public defender has a surprisingly contentious history one that offers insights not only about the carceral state but also about the contours and compromises of twentieth century liberalism First gaining appeal amidst the Progressive Era fervor for court reform the public defender idea was swiftly quashed by elite corporate lawyers who believed the legal profession should remain independent from the state Public defenders took hold in some localities but not yet as a nationwide standard By the 1960s views had shifted Gideon v Wainwright enshrined the right to counsel into law and the legal profession mobilized to expand the ranks of public defenders nationwide Yet within a few years lawyers had already diagnosed a crisis of underfunded overworked defenders providing inadequate representation a crisis that persists today This book shows how these conditions often attributed to recent fiscal emergencies have deep roots and it chronicles the intertwined histories of constitutional doctrine big philanthropy professional in fighting and Cold War culture that made public defenders ubiquitous but embattled figures in American courtrooms

Effectiveness of teachers' guides in the Global South Benjamin Piper, Yasmin Sitabkhan, Jessica Mejia, Kellie Betts, 2018-05-10 This report presents the results of RTI International Education's study on teachers guides across 13 countries and 19 projects Using quantitative and qualitative methods we examine how teachers guides across the projects differ and find substantial variation in the design and structure of the documents We develop a

scripting index so that the scripting levels of the guides can be compared across projects The impact results of the programs that use teachers guides show significant impacts on learning outcomes associated with approximately an additional half year of learning showing that structured teachers guides contribute to improved learning outcomes During observations we find that teachers make a variety of changes in their classroom instruction from how the guides are written showing that the utilization of structured teachers guides do not create robotic teachers unable to use their own professional skills to teach children Unfortunately many changes that teachers make reduce the amount of group work and interactivity that was described in the guides suggesting that programs should encourage teachers to more heavily utilize the instructional routines designed in the guide The report includes a set of research based guidelines that material developers can use to develop teachers guides that will support effective instructional practices and help improve learning outcomes The key takeaway from the report is that structured teachers guides improve learning outcomes but that overly scripted teachers guides are somewhat less effective than simplified teachers guides that give specific guidance to the teacher but are not written word for word for each lesson in the guide

Approximate Number System and Mathematics Jingguang Li,Xinlin Zhou,Marcus Lindskog,2019-11-25 Humans process quantity information without the aid of language or symbols to guide a variety of everyday life decisions The cognitive system that supports this intuitive skill is often referred to as the approximate number system ANS It has been argued that the ANS serves as the foundation of the formal symbolic number system mathematics Abundant empirical evidence is supportive of this view acuity of the ANS is positively correlated with symbolic math performance training of the ANS may cause improvements in symbolic math performance and the ANS and symbolic number processing may share a common neural underpinning However recently several theories and empirical data cast doubt on the role of the ANS in symbolic math processing This e book aims to advance our understanding of the underlying mechanisms of the overlap between the ANS and mathematics
