Using Children's Literature in Math and Science, 1997 **Resources in Education**, 2001-10 *Teaching Learners with Visual Impairment* Maximus M. Sefotho, Ronél Ferreira, 2020-12-31 This book *Teaching Learners with Visual Impairment* focuses on holistic support to learners with visual impairment in and beyond the classroom and school context. Special attention is given to classroom practice, learning support, curriculum differentiation and assessment practices to mention but a few areas of focus covered in the book. In this manner, this book makes a significant contribution to the existing body of knowledge on the implementation of inclusive education policy with learners affected by visual impairment.

Reader's Guide to Periodical Literature Supplement, 1923 Learning and Teaching Early Math Douglas H. Clements, Julie Sarama, 2014-05-23 In this important book for pre and in-service teachers, early math experts Douglas Clements and Julie Sarama show how learning trajectories help diagnose a child's level of mathematical understanding and provide guidance for teaching. By focusing on the inherent delight and curiosity behind young children's mathematical reasoning, learning trajectories ultimately make teaching more joyous. They help teachers understand the varying levels of knowledge exhibited by individual students, which in turn allows them to better meet the learning needs of all children. Using straightforward, no-nonsense language, this book summarizes the current research about how children learn mathematics and how to build on what children already know to realize more effective teaching. This second edition of *Learning and Teaching Early Math* remains the definitive research-based resource to help teachers understand the learning trajectories of early mathematics and become quintessential professionals. Updates to the new edition include: Explicit connections between Learning Trajectories and the new Common Core State Standards; New coverage of patterns and patterning; Incorporation of hundreds of recent research studies. **Global Perspectives on Inclusive Teacher Education** Rice, Bethany

M., 2019-03-01 Inclusive teacher preparation varies greatly in format and practice, yet programs grapple with the same underlying challenges: which practices work and where do they work? As children with disabilities are increasingly being included in schools, it is essential that guidance is put into place on how best to adapt inclusive practices into the classroom and create new practices based on the cultural context. *Global Perspectives on Inclusive Teacher Education* summarizes existing research on inclusive practices globally while presenting emerging research and opportunities for cementing change in inclusive teacher education locally, including examples of how inclusive practices are integrated in and adapted to diverse cultural contexts. Covering topics that include critical pedagogy, religious schooling and teacher education, this publication is designed for curriculum developers, instructional designers, administrators, higher education faculty, educators, policymakers and students. Content Area Literacy for Diverse Learners Virginia McCormack, 2008 contains useful information and concepts that teachers can apply in the classroom and other instructional settings. There is also a detailed resource section listing children's literature and websites that can enhance your instructional practice. This helpful and comprehensive

resource can be used by preservice teachers by experienced teachers and administrators for development of staff at all levels and by individuals in Alternate Route Teacher Certification programs Page 4 of cover
