Tectonic Geomorphology of Mountains William B. Bull, 2008-04-15 With a balance of theory and practical applications Tectonic Geomorphology of Mountains is essential reading for research geologists and upper level undergraduate and graduate students in the earth sciences This book describes how tectonic events influence geomorphic processes and explores how landscapes respond to tectonic deformation in the ways in which they are weathered washed and abraded Uses new approaches to enhance theoretical models of landscape evolution and to solve practical problems such as the assessment of earthquake hazards Includes previously unpublished research and theory Examines how to use key landforms as reference levels in changing landscapes estimate rates of mountain range uplift and map seismic shaking caused by prehistorical earthquakes Presents a diverse range of examples from around the world

Quaternary Geology and Geomorphology, Smithers-Terrace-Prince Rupert Area, British Columbia John J. Clague, 1984 This report contains a detailed description of the unconsolidated sedimentary materials and landforms in the Smithers Terrace Prince Rupert region and an account of the geological processes that have been active in shaping this area during late Quaternary time The information in this report is vital to an understanding of the character and distribution of agricultural soils the nature of foundation conditions the location and extent of construction aggregate and aquifers and the nature of natural hazards in the region

Natural and Anthropogenic Influences in Fluvial Geomorphology John E. Costa, 1995-01-09 Published by the American Geophysical Union as part of the Geophysical Monograph Series Volume 89 This book concentrates on the development and evolution of fluvial systems by natural and human processes highlighting new insights and knowledge about the concept of magnitude and frequency effects of land use and effects of human regulation of streamflow The papers describe new research developments and approaches to understanding the origins of channels water and sediment movement on slopes and in streams the magnitude and frequency of physical processes that affect water and sediment movement and the implications of these processes for policy decisions such as stream restoration This is an appropriate time to pause and evaluate what is known about the hydrologic interactions of natural processes changing land use and forced physical constraints on hillslope and fluvial systems The recent emphasis on ecosystems by the federal government and the inseparable connection to hydrology make these prime subjects to ponder in this volume Included are papers that directly address some of the most difficult and pressing issues related to the role of geomorphology in strategic science
