Grd10 November Examination 2014:

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience. **The State of the System** Paul W. Bennett, 2020-09-23

Over the last fifty years Canada's public schools have been absorbed into a modern education system that functions much like Max Weber's infamous iron cage. Crying out for democratic school level reform, the system is now a centralized bureaucratic fortress that every year becomes softer on standards for students less accessible to parents, further out of touch with communities and surprisingly unresponsive to classroom teachers. Exploring the nature of the Canadian education order in all its dimensions, *The State of the System* explains how public schools came to be so bureaucratic, confronts the critical issues facing kindergarten to grade 12 public schools in all ten provinces, and addresses the need for systemic reform. Going beyond a diagnosis of the stresses, strains, and ills present in the system, Paul Bennett proposes a bold plan to re-engineer schools on a more human scale as the first step in truly reforming public education. In place of school consolidation and managerialism, one size fits all uniformity, limited school choice, and the success for all curriculum, Bennett advocates for a new set of priorities: decentralize school governance, deprogram education ministries and school districts, listen to parents and teachers, and revitalize local education democracy. Tackling the thorny issues besetting contemporary school systems in Canada, *The State of the System* issues a clarion call for more responsive, engaged, and accountable public schools. **Research for Educational Change** Jill Adler, Anna Sfard, 2016-06-17

Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice. Focussing its discussion within the context of mathematics education, it argues that while research generated insights can have beneficial effects on learning and teaching, the question of how these effects are to be generated and sustained is far from evident. The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice. In the first part of the book, four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom. In the second part, each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is

happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research
