As you have seen already, the periodic table is divided into a short and a long form. The short form is a periodic table without lanthanides and actinides. A separate sheet is placed at the bottom of the periodic table and represents the lanthanides and actinides placed below the short form.

The lanthanides are placed in the long form and there is a break in the periodic table between the lanthanides and actinides. The lanthanides are placed in the long form and there is a break in the periodic table between the lanthanides and actinides.

For the purpose of the work to be done in this, the short form is used.
