Race and Beauty Josie Schoel, 2025-04-29 This work examines how beauty standards specifically the ideology of fairness contributed to the racialization of bodies in early modern England Schoel emphasizes the need to dismantle whiteness's invisibility in historical criticism noting that it has long been an unexamined norm By focusing on the materiality of cosmetic whiteness the text aims to disrupt colorblind ideologies and reveal the mechanisms behind white supremacy Drawing on diverse texts like sonnets travel literature and medical treatises the book discusses how light skin and hair were idealized symbolizing Christian virtue and femininity This rhetoric of fairness not only promoted racial hierarchies but also constructed whiteness through cosmetics like whitening creams and exfoliants These practices associated with Queen Elizabeth I's image and widely reproduced in theater medicine and household texts led to a cult of whiteness The locus of the cult was Queen Elizabeth I whose materially constructed reds and whites in her portraiture and on the surface of her skin resounded throughout the commonwealth If the cult of whiteness was founded by Elizabeth's propagandistic image campaign it was facilitated and reproduced through theatrical productions medical treatises household manuals and the birth of the apothecary which made the materials of whiteness accessible to a wider socially diverse network of consumers The book is not only an ideal resource for students and scholars of early modern studies performance and Critical Race Studies but for all those seeking an introduction to constructions of race in early modern England

Rice,2013-12-17 First published in 1930 this book deals with Byzantine art not as an isolated province but as one intimately connected with the subsequent history of European painting After a summary of the whole question in its relation to modern art the second chapter opens with a novel analysis of the iconoclast controversy and shows how it was only by this movement that Hellenistic naturalism was finally vanquished and the seed of interpretational art planted in Europe in its stead The third chapter reveals how this seed was nourished by the Constantinopolitan Renaissance and how that event combined with the increasing humanisation of religious emotion culminated not only in Duccio and Giotto but in the equally important work of their contemporaries at Mistra and Mount Athos A detailed account of these works is given and in the last part of the book the mystery of El Greco is finally resolved The book is based not only on extensive research but on personal observation of nearly all the works mentioned in Constantinople Greece Crete Italy and Spain It is an important and exciting addition to the history of European Art and establishes scientifically theories which only existed in conjecture before its publication The book includes 94 black and white plates
