progress Some alternative fuels will naturally be higher in some categories than others For example gasoline has higher energy density but when burned in internal combustion engines has low efficiency Batteries on the other hand have low energy density but are efficient for powering electric motors For mapping out a long term future and deciding how best to invest resources a comparison of these critical criteria should help The book is concisely written for executives decision makers academics automotive engineers and others who want or need a long range view of trends that will influence vehicle fuels for the next 20 years **The Complete Idiot's Guide to Green Living** Trish Riley,2007-09-04 The environmental movement and rising awareness of global warming have sparked an interest in green living People want to know what they can do to live sustainable lives In this book you will find an overview of global warming and environmental degradation of air water soil what sustainable living is and how to do it how to cut down on carbon output the cause of global warming with alternative cars and fuels and environmentally friendly home and lawn care products **The Chicago Guide to Writing About Numbers** Jane E. Miller,2015-04-09 For students scientists journalists and others a comprehensive guide to communicating data clearly and effectively Acclaimed by scientists journalists faculty and students The Chicago Guide to Writing about Numbers has helped thousands communicate data clearly and effectively It offers a much needed bridge between good quantitative analysis and clear expository writing using straightforward principles and efficient prose With this new edition Jane Miller draws on a decade of additional experience and research expanding her advice on reaching everyday audiences and further integrating non print formats Miller an experienced teacher of research methods statistics and research writing opens by introducing a set of basic principles for writing about numbers then presents a toolkit of techniques that can be applied to prose tables charts and presentations She emphasizes flexibility showing how different approaches work for different kinds of data and different types of audiences The second edition adds a chapter on writing about numbers for lay audiences explaining how to avoid overwhelming readers with jargon and technical issues Also new is an appendix comparing the contents and formats of speeches research posters and papers to teach writers how to create all three types of communication without starting each from scratch An expanded companion website includes new multimedia resources such as slide shows and podcasts that illustrate the concepts and techniques along with an updated study guide of problem sets and suggested course extensions This continues to be the only book that brings together all the tasks that go into writing about numbers integrating advice on finding data calculating statistics organizing ideas designing tables and charts and writing prose all in one volume Field tested with students and professionals alike this is the go to guide for everyone who writes or speaks about numbers **The Chicago Guide to Writing about Multivariate Analysis, Second Edition** Jane E. Miller,2013-09-26 Many different people from social scientists to government agencies to business professionals depend on the results of multivariate models to inform their decisions Researchers use these advanced statistical techniques to analyze relationships among multiple variables such as how exercise and weight relate to the risk of

heart disease or how unemployment and interest rates affect economic growth Yet despite the widespread need to plainly and effectively explain the results of multivariate analyses to varied audiences few are properly taught this critical skill The Chicago Guide to Writing about Multivariate Analysis is the book researchers turn to when looking for guidance on how to clearly present statistical results and break through the jargon that often clouds writing about applications of statistical analysis This new edition features even more topics and real world examples making it the must have resource for anyone who needs to communicate complex research results For this second edition Jane E Miller includes four new chapters that cover writing about interactions writing about event history analysis writing about multilevel models and the Goldilocks principle for choosing the right size contrast for interpreting results for different variables In addition she has updated or added numerous examples while retaining her clear voice and focus on writers thinking critically about their intended audience and objective Online podcasts templates and an updated study guide will help readers apply skills from the book to their own projects and courses This continues to be the only book that brings together all of the steps involved in communicating findings based on multivariate analysis finding data creating variables estimating statistical models calculating overall effects organizing ideas designing tables and charts and writing prose in a single volume When aligned with Miller s twelve fundamental principles for quantitative writing this approach will empower readers whether students or experienced researchers to communicate their findings clearly and effectively

The New Domestic Automakers in the United States and Canada A.J. Jacobs, 2015-12-16 Over the past forty years state provincial and local governments in the United States and Canada have provided foreign automakers with approximately 4 80 billion in incentives in order to lure light vehicles assembly plants to their areas This has included tax abatements infrastructure construction land giveaways job training programs and other subsidies As of early 2015 ten foreign vehicle makers operated 20 light vehicles in developed North America Despite the fact that all ten of these automakers have pursued a similar pattern first exporting vehicles into the United States and Canada before launching vehicle plants in developed North America each has followed its own specific historical development path and has created its own unique growth trajectory This book provides a unique historical and qualitative review of these ten vehicle makers from their early beginnings to their export entry into the United States and or Canada through early 2015 In addition it chronicles the histories of more than a dozen former automakers and potential future foreign light motor vehicle assembly plants in the United States and Canada This includes the first foreign automaker to build its cars in the United States De Dion Bouton of France in July 1900 the early 20th Century endeavors of Fiat Mercedes and Rolls Royce and the present day hopes of Chinese and Indian automakers In the process the text also provides an assessment of the top competing states and sites for any future plants the possible incentives packages governments may offer to attract such facilities and an estimated incentive value for each automaker Overall the goal of this book is to expand the knowledge of policymakers at all tiers of government in the United States and Canada and to help them take a more

holistic look at the pros and cons of attracting Automobile Manufacturing FDI It is hoped that this will enable them to make more informed decisions when pursuing a new foreign motor vehicle assembly plant Its findings should also prove informative to urban and regional planning political science sociology economics labor and international development scholars and students in North America and worldwide
