

Class IX: Biology
Chapter 5: The fundamental unit of life.

Chapter Notes

Key learnings:

- 1) In 1665, Robert Hooke first discovered and named the cells.
- 2) Cell is the structural and functional unit of all living organisms.
- 3) Organisms may be unicellular or multicellular. A single cell constitutes the unicellular organism whereas many cells coordinately function in case of multicellular organism.
- 4) The size, shape and volume of the cell are related to the specific function that they perform.
- 5) A cell generally shows plasma membrane, nucleus and cytoplasm
- 6) Plasma membrane is a thin, selectively permeable membrane, covering the cell and is made up of lipids and proteins.
- 7) Functions of plasma membrane :
 - i) It separates the contents of a cell from its outside environment.
 - ii) It regulates the flow of substances to and from the cell through diffusion, facilitated diffusion, active transport and endocytosis.
- 8) Osmosis is diffusion of water through a selectively permeable membrane.
- 9) A cell placed in different solutions:
 - i. hypotonic solution : A cell placed in it will gain water.
 - ii. hypertonic solution: A cell placed in it will lose water: Also known as plasmolysis.
 - iii. isotonic solution: A cell placed in it will neither gain nor lose water
- 10)

Cells of Plants, fungi & bacteria: Contain both plasma membrane & cell wall. Cell wall is rigid, non-living & outer most covering, composed mainly of cellulose.
- 11) When placed in hypertonic solution, a living plant cell shows plasmolysis
- 12) Cell wall provides mechanical strength to the cell. It permits the cell to withstand huge changes in the surrounding medium.

Ix Biology Chapter Notes:

The Biologising of Childhood John R. Morss, 1990 **The Age of Empathy** Frans de Waal, 2009-09-22 In this thought provoking book the acclaimed author of *Our Inner Ape* examines how empathy comes naturally to a great variety of animals including humans Are we our brothers keepers Do we have an instinct for compassion Or are we as is often assumed only on earth to serve our own survival and interests By studying social behaviors in animals such as bonding the herd instinct the forming of trusting alliances expressions of consolation and conflict resolution Frans de Waal demonstrates that animals and humans are preprogrammed to reach out He has found that chimpanzees care for mates that are wounded by leopards elephants offer reassuring rumbles to youngsters in distress and dolphins support sick companions near the water's surface to prevent them from drowning From day one humans have innate sensitivities to faces bodies and voices we've been designed to feel for one another De Waal's theory runs counter to the assumption that humans are inherently selfish which can be seen in the fields of politics law and finance But he cites the public's outrage at the U.S. government's lack of empathy in the wake of Hurricane Katrina as a significant shift in perspective one that helped Barack Obama become elected and ushered in what perhaps could become an Age of Empathy Through a better understanding of empathy's survival value in evolution de Waal suggests we can work together toward a more just society based on a more generous and accurate view of human nature Written in layman's prose with a wealth of anecdotes wry humor and incisive intelligence *The Age of Empathy* is essential reading for our embattled times An important and timely message about the biological roots of human kindness Desmond Morris author of *The Naked Ape* **Sociobiology: Sense or Nonsense?** M. Ruse, 2012-12-06 In June 1975 the distinguished Harvard entomologist Edward O. Wilson published a truly huge book entitled *Sociobiology: The New Synthesis* In this book drawing on both fact and theory Wilson tried to present a comprehensive overview of the rapidly growing subject of sociobiology the study of the biological nature and foundations of animal behaviour more precisely animal social behaviour Although as the title rather implies Wilson was more surveying and synthesising than developing new material he compensated by giving the most thorough and inclusive treatment possible beginning in the animal world with the most simple of forms and progressing via insects lower invertebrates mammals and primates right up to and including our own species *Homo sapiens* Initial reaction to the book was very favourable but before the year was out it came under withering attack from a group of radical scientists in the Boston area who styled themselves *The Science for the People Sociobiology Study Group* Criticism of course is what every academic gets and needs but for two reasons this attack was particularly unpleasant First not only were Wilson's ideas attacked but he himself was smeared by being linked with the most reactionary of political thinkers including the Nazis **Psychology Library Editions: Child Development** Various, 2021-12-02 Psychology Library Editions *Child Development* 20 Volume set brings together a diverse number of titles across many areas of developmental psychology from children's play to language development The series of previously out of print titles

Michael Ruse,2013-03-09 In June 1975 the distinguished Harvard entomologist Edward O Wilson published a truly huge book entitled Sociobiology The New Synthesis In this book drawing on both fact and theory Wilson tried to present a comprehensive overview of the rapidly growing subject of sociobiology the study of the biological nature and foundations of animal behaviour more precisely animal social behaviour Although as the title rather implies Wilson was more surveying and synthesising than developing new material he compensated by giving the most thorough and inclusive treatment possible beginning in the animal world with the most simple of forms and progressing via

insects lower invertebrates mammals and primates right up to and including our own species *Homo sapiens*. Initial reaction to the book was very favourable but before the year was out it came under withering attack from a group of radical scientists in the Boston area who styled themselves The Science for the People Sociobiology Study Group. Criticism of course is what every academic gets and needs but for two reasons this attack was particularly unpleasant. First not only were Wilson's ideas attacked but he himself was smeared by being linked with the most reactionary of political thinkers including the Nazis.
