which took place in Larnaca Cyprus in May 2014 The 27 papers in this volume were carefully reviewed and selected from 53 submissions and were revised and extended after the event The workshop topics covered applications and economics of knowledge based technologies AKTB business and IT alignment BITA digital currencies DC modern applications of business information systems MODAPP and tools for setting up and running a business in cloud computing TSRB In addition a keynote paper is included in this book **Travellers, Merchants and Settlers in the Eastern Mediterranean, 11th-14th Centuries** David Jacoby,2023-05-31 This collection of studies the eighth by David Jacoby covers a period witnessing intensive geographic mobility across the Mediterranean illustrated by a growing number of Westerners engaging in pilgrimage crusade trading and shipping or else driven by sheer curiosity This movement also generated western settlement in the eastern Mediterranean region A complex encounter of Westerners with eastern Christians and the Muslim world occurred in crusader Acre the focus of two papers a major emporium it was also the scene of fierce rivalry between the Italian maritime powers The fall of the crusader states in 1291 put an end to western mobility in the Levant and required a restructuring of trade in the region The next five studies show how economic incentives promoted western settlement in the Byzantine provinces conquered by western forces during the Fourth Crusade and soon after Venice fulfilled a major function in Latin Constantinople from 1204 to 1261 The city s progressive economic recovery in that period paved the way for its role as transit station furthering western trade and colonization in the Black Sea region Venice had also a major impact on demographic and economic developments in Euboea located along the maritime route connecting Italy to Constantinople On the other hand military factors drove an army of western mercenaries to establish in central Greece a Catalan state which survived from 1311 to the 1380s *Indigenous People and Mobile Technologies* Laurel Evelyn Dyson,Stephen Grant,Max Hendriks,2015-10-05 In the rich tradition of mobile communication studies and new media this volume examines how mobile technologies are being embraced by Indigenous people all over the world As mobile phones have revolutionised society both in developed and developing countries so Indigenous people are using mobile devices to bring their communities into the twenty first century The explosion of mobile devices and applications in Indigenous communities addresses issues of isolation and building an environment for the learning and sharing of knowledge providing support for cultural and language revitalisation and offering the means for social and economic renewal This book explores how mobile technologies are overcoming disadvantage and the tyrannies of distance allowing benefits to flow directly to Indigenous people and bringing wide ranging changes to their lives It begins with general issues and theoretical perspectives followed by empirical case studies that include the establishment of Indigenous mobile networks and practices mobile technologies for social change and finally the ways in which mobile technology is being used to sustain Indigenous culture and language **Fiber-Wireless Convergence in Next-Generation Communication Networks** Massimo Tornatore,Gee-Kung Chang,Georgios Ellinas,2017-01-05 This book investigates new enabling technologies for Fi Wi convergence The editors

discuss Fi Wi technologies at the three major network levels involved in the path towards convergence system level network architecture level and network management level The main topics will be a At system level Radio over Fiber digitalized vs analogic standardization E band and beyond and 5G wireless technologies b Network architecture level NGPON WDM PON BBU Hotelling Cloud Radio Access Networks C RANs HetNets c Network management level SDN for convergence Next generation Point of Presence Wi Fi LTE Handover Cooperative MultiPoint *Information Communication Technology and Poverty Alleviation* Jack J. Barry,2018-07-24 Despite global economic disparities recent years have seen rapid technological changes in developing countries as it is now common to see people across all levels of society with smartphones in their hands and computers in their homes However does access to Information Communication Technologies ICTs actually improve the day to day lives of low income citizens This book argues that access to the internet can help alleviate poverty improve development outcomes and is now vital for realizing many human rights This book posits that good governance is essential to the realization of inclusive pro poor development goals and puts forward policy recommendations that aim to mitigate the complex digital divide by employing governance as the primary actor In making his argument the author provides a quantitative analysis of developing countries conjoined with a targeted in depth study of Mexico This mixed method approach provides an intriguing case for how improvements in the quality of governance impacts both ICT penetration and poverty alleviation Overall the book challenges the neoliberal deterministic perspective that the open market will solve technology diffusion and argues instead that good governance is the lynchpin that creates conducive conditions for ICTs to make an impact on poverty alleviation In fact the digital divide should not be considered binary rather it is a multifaceted problem where income education and language all need to be considered to address it effectively This book will be useful for researchers students of development communication technologies and comparative politics as well as for development practitioners and policy makers with an interest in how modern technology is impacting the poor in the developing world **Encyclopedia of Public Administration and Public Policy - 5 Volume Set** Domonic A.
