Managerial accountants compute and provide information within a company. Managerial accounting information is numeric, calculated using certain formulas. The following list summarizes some of the most important formulas in managerial accounting.

Formula 1: The Accounting Equation

The accounting equation equates assets with liabilities and owners' equity:

$$\text{Assets} = \text{Liability} + \text{Owners' Equity}$$

Assets are things owned by the company — such as cash, inventory, and equipment — that will provide some future benefit. *Liabilities* entail future sacrifices that the company must make, such as paying bills or other kinds of debts. *Owners' equity* represents the portion of the company that actually belongs to the owner.

A basic rule of accounting is that the accounting equation must always balance. If assets exceed the sum of liabilities and owners' equity, then the company holds things that don't belong to anyone. If the sum of liabilities and owners' equity exceeds assets, then owners and creditors lay claim to things that don't exist.

Formula 2: Net Income

Net income is called the *bottom line* because in many ways it's the sum total of accountants' work. To calculate net income, subtract expenses from [revenues](#):

$$\text{Revenues} - \text{Expenses} = \text{Net income}$$

Revenues are inflows and other kinds of sales to customers. *Expenses* are costs associated with making sales. Accountants also sometimes need to add gains or subtract losses in net income; these gains and losses come from miscellaneous events that affect stockholder value, such as selling equipment at a gain or getting your factory destroyed by a mutated prehistoric survivor of the dinosaurs.

Formula 3: Cost of Goods Sold

For manufacturers and retailers, *cost of goods sold* measures how much the company paid — or will need to pay — for inventory items sold.

To compute a retailer's cost of goods sold, use the following formula:

$$\text{Beginning} + \text{Inputs} = \text{Outputs}$$

Cost of beginning inventory + Cost of purchases – Cost of ending inventory = Costs of goods sold
