HUMAN RESOURCE MANAGEMENT, SEVENTH EDITION PATTANAYAK, BISWAJEET, 2025-06-02

Human intellect remains irreplaceable. Despite rapid technological advancements and the rise of artificial intelligence, technology will always serve as a tool to enable progress rather than replacing the human touch. In any organization, human resources are the most valuable asset, and managing them is often more complex than handling technology due to the absence of programming or automation. In today's fast-evolving global business environment, the role of human resource management (HRM) has undergone a significant transformation. HRM is now more strategic, playing a crucial role in adding value to organizational goals. Changes in workforce demographics, business dynamics, and technological innovations have prompted a revision of this book's content to ensure it remains relevant and aligned with contemporary needs. The seventh edition of this book is a thoroughly updated and revised version designed to enhance students' understanding of HRM in the rapidly changing business world. It incorporates the latest research, applications, and real-world examples to bridge theory and practice effectively.

Autobiographical accounts by Nobel laureates reflect the richness and diversity of contemporary economic thought and offer insights into the creative process with six new laureates *Lives of the Laureates* offers readers an informal history of modern economic thought as told through autobiographical essays by thirty-two Nobel Prize laureates in economics. The essays not only provide unique insights into major economic ideas of our time but also shed light on the processes of intellectual discovery and creativity. The accounts are accessible and engaging, achieving clarity without sacrificing inherently difficult content. This seventh edition adds six Nobelists to its pages. Roger B. Myerson, co-recipient in 2007, describes his evolution as a game theorist and his application of game theory to issues that ranged from electoral systems to perverse incentives. Thomas J. Sargent, co-recipient in 2011, recounts the development of the rational expectations model, which fundamentally changed the policy implications for macroeconomic models. Amartya Sen, recipient in 1998, reflects on his use of a bicycle later donated to the Nobel Museum to collect data early in his career. A. Michael Spence, co-recipient in 2001, describes among other things his whiplash inducing first foray into teaching an undergraduate class. Christopher A. Sims, co-recipient in 2011, discusses his non-Nobel research. Alvin E. Roth, co-recipient in 2012, chronicles the three insurrections he has witnessed in mainstream economics. *Lives of the Laureates* grows out of a continuing lecture series at Trinity University in San Antonio which invites Nobelists from American universities to describe their evolution as economists in personal as well as technical terms. The Laureates: W. Arthur Lewis, Lawrence R. Klein, Kenneth J. Arrow, Paul A. Samuelson, Milton Friedman, George J. Stigler, James Tobin, Franco Modigliani, James M. Buchanan, Robert M.
