Combating Inequality Olivier Blanchard, Dani Rodrik, 2023-08-15 Leading economists and policymakers consider what economic tools are most effective in reversing the rise in inequality Economic inequality is the defining issue of our time In the United States the wealth share of the top 1% has risen from 25% in the late 1970s to around 40% today The percentage of children earning more than their parents has fallen from 90% in the 1940s to around 50% today In *Combating Inequality* leading economists many of them current or former policymakers bring good news we have the tools to reverse the rise in inequality In their discussions they consider which of these tools are the most effective at doing so The contributors express widespread agreement that we need to aim policies at economic inequality itself deregulation and economic stimulus will not do the job No longer does anyone ask in relation to expanded social programs Can we pay for it And most believe that US taxes will have to rise although they debate whether the progressivity should focus on the revenue side or the expenditure side through broad based taxes like the VAT or through a wealth tax aimed at the very top of the income scale They also consider the philosophical aspects of inequality whether it is bad in itself or because of its consequences the risks and benefits of more radical interventions to change the nature of production and trade and future policy directions Contributors Daron Acemoglu Philippe Aghion Danielle Allen Ben Ansell David Autor Sheri Berman Marianne Bertrand Olivier Blanchard Lucas Chancel William Darity Jr Peter Diamond Christian Dustmann David T Ellwood Richard Freeman Caroline Freund Jason Furman Hilary Hoynes Lawrence F Katz Wojciech Kopczuk N Gregory Mankiw Nolan McCarty Dani Rodrik Jesse Rothstein Emmanuel Saez T M Scanlon Heidi Shierholz Tharman Shanmugaratnam Stefanie Stantcheva Michael Stynes Laura D Andrea Tyson Philippe Van Parijs Gabriel Zucman Handbook of Macroeconomics John B. The Climate Casino William Nordhaus, 2013-10-22 Climate change is profoundly altering our world in ways that pose major risks to human societies and natural systems We have entered the Climate Casino and are rolling the global warming dice warns economist William Nordhaus But there is still time to turn around and walk back out of the casino and in this essential book the author explains how

Bringing together all the important issues surrounding the climate debate Nordhaus describes the science economics and politics involved and the steps necessary to reduce the perils of global warming Using language accessible to any concerned citizen and taking care to present different points of view fairly he discusses the problem from start to finish from the beginning where warming originates in our personal energy use to the end where societies employ regulations or taxes or subsidies to slow the emissions of gases responsible for climate change

Nordhaus offers a new analysis of why earlier policies such as the Kyoto Protocol failed to slow carbon dioxide emissions how new approaches can succeed and which policy tools will most effectively reduce emissions In short he clarifies a defining problem of our times and lays out the next critical steps for slowing the trajectory of global warming

Handbook of Public Economics Martin Feldstein, A.J. Auerbach, 2002-01-25 The Field of Public Economics has been changing rapidly in recent years and the sixteen chapters contained in this Handbook survey many of the new developments As a field Public Economics is defined by its objectives rather than its techniques and much of what is new is the application of modern methods of economic theory and econometrics to problems that have been addressed by economists for over two hundred years More generally the discussion of public finance issues also involves elements of political science finance and

philosophy These connections are evidence in several of the chapters that follow Public Economics is the positive and normative study of government's effect on the economy We attempt to explain why government behaves as it does how its behavior influences the behavior of private firms and households and what the welfare effects of such changes in behavior are Following Musgrave 1959 one may imagine three purposes for government intervention in the economy allocation when market failure causes the private outcome to be Pareto inefficient distribution when the private market outcome leaves some individuals with unacceptably low shares in the fruits of the economy and stabilization when the private market outcome leaves some of the economy's resources underutilized The recent trend in economic research has tended to emphasize the character of stabilization problems as problems of allocation in the labor market The effects that government intervention can have on the allocation and distribution of an economy's resources are described in terms of efficiency and incidence effects These are the primary measures used to evaluate the welfare effects of government policy
