**History of Romanian Technology and Industry** Dorel

Banabic, 2023-09-21 This volume showcases the valuable achievements of the Romanian technology and industry worldwide

It started from the premise that the history of Romanian technique is scarcely known outside the borders of Romania The

main Romanian contributions to the world s technological heritage are missing except for a few names in the field of aviation from the great encyclopedias and dictionaries published worldwide This is due among other reasons to the insufficient

promotion in widely spoken languages of the history of Romanian technology The multidisciplinary approach of the volumes

means that the field of technology had to be split into several branches The present volume includes the following industries

electrical engineering energy technology biomedicine maritime and rail transport automotive industry aviation The history of

engineering societies of engineering education of intellectual property and of inventions as well as a synopsis of the

personalities of Romanian engineering have been tackled in separate chapters For each field are engaged the collaboration

of authors who have already published a history of their field Certain chapters were drafted with the aid of specialists who

have played the part of policy makers in the elaboration of development strategies for Romania and who are familiar not only

with the facts and the history of their field but also with the philosophy behind its development **Spain: Selected Issues**
