Martin Viewpoint Manual:

Manual of Romance Morphosyntax and Syntax Andreas Dufter, Elisabeth Stark, 2017-09-25 This volume offers theoretically informed surveys of topics that have figured prominently in morphosyntactic and syntactic research into Romance languages and dialects We define syntax as being the linguistic component that assembles linguistic units such as roots or functional morphemes into grammatical sentences and morphosyntax as being an umbrella term for all morphological relations between these linguistic units which either trigger morphological marking e g explicit case morphemes or are related to ordering issues e g subjects precede finite verbs whenever there is number agreement between them All 24 chapters adopt a comparative perspective on these two fields of research highlighting cross linguistic grammatical similarities and differences within the Romance language family In addition many chapters address issues related to variation observable within individual Romance languages and grammatical change from Latin to Romance

Manual of Romance Word Classes Anna-Maria De Cesare, Giampaolo Salvi, 2024-09-02 Word classes are linguistic categories serving as basis in the description of the vocabulary and grammar of natural languages While important publications are regularly devoted to their definition identification and classification in the field of Romance linguistics we lack a comprehensive state of the art overview of the current research This Manual offers an updated and detailed discussion of all relevant aspects related to word classes in the Romance languages In the first part word classes are discussed from both a theoretical and historical point of view The second part of the volume takes as its point of departure single word classes described transversally in all the main Romance languages while the third observes the relevant word classes from the point of view of specific Romance based varieties The fourth part explores Romance word classes at the interface of grammar and other fields of research The Manual is intended as a reference work for all scholars and students interested in the description of both the standard major Romance languages and the smaller lesser described Romance based varieties
