Education Flashpoints Alan J. Singer, 2014-04-24 Drawing on his widely read Huffington Post columns, rated one of the top educational blogs in the United States, Alan Singer introduces readers to contemporary issues in education in the United States. The issues are presented with a point of view and an edge intended to promote widespread classroom debate and discussion. Each section opens with a new topical summary essay followed by a series of brief essays updated and adapted from Huffington Post columns. The book includes guest contributions, guiding questions, and responses to essays by teacher education students and teachers to further classroom discussion. *Education Flashpoints* is written in a conversational style that draws readers into a series of debates by presenting issues in a clear and concise manner but also with a touch of irony and a bit of rhetorical bite. The topics examined

in these essays read like the latest newspaper headlines in the battle to define public education in the United States *The Roots of Low Achievement* Sandra Stotsky, 2019-07-02 The chief purpose of this book is to explain how public education in this country became dysfunctional as a result of the education policies and programs funded by the federal government to address low academic achievement It highlights student effort as a central factor in academic achievement based on research noting its significance Teachers and school administrators cannot make children ready for college or career by grade 12 if their parents do not make them ready for school learning by kindergarten or grade 1 Once both the schools and students parents together made students ready for membership in our civic culture They learned they were politically equal to each other with a shared civic identity regardless of academic achievement Yet policy makers at USED and philanthropists in this country with a professed interest in the education of low achievers want low achievers to believe that their academic status is all that matters and that they haven't succeeded academically because of bigoted teachers administrators and communities Parent school partnerships need to revive their community's agreed upon mission for public education if we are to alter the roots of low achievement in this country **Evidence, Politics, and Education Policy** Lorraine M. McDonnell, M. Stephen Weatherford, 2021-02-01

In *Evidence Politics and Education Policy* political scientists Lorraine M. McDonnell and M. Stephen Weatherford provide an original analysis of evidence use in education policymaking to help scholars and advocates shape policy more effectively The book shows how multiple types of evidence are combined as elected officials and their staffs work with researchers advocates policy entrepreneurs and intermediary organizations to develop create and implement education policies *Evidence Politics and Education Policy* offers an in depth understanding of the political environment in which evidence is solicited and used Two key case studies inform the book's findings The primary case a major multimethod study examines the development and early implementation of the Common Core State Standards at the national level and in four states California Indiana Massachusetts and Tennessee A comparative case analyzes the evidence used in Congressional hearings over the twenty year history of the Children's Health Insurance Program Together the two cases illustrate the conditions under which different types of evidence are used and in particular how federalism the complexity of the policy problem and the policy's maturity shape evidence use McDonnell and Weatherford focus on three leverage points for strengthening the use of research evidence in education policy integrating research findings with value based policy ideas designing policies with incentives for research use built into their rules and organizational structures and training policy analysts to promote the use of research in policymaking venues **Common Sense about Common Core**

Jim Dueck, 2016-02-02 *Common Sense about Common Core* breaks down everything you need to know about the Common Core from how it was implemented to where we are now Common Core has emerged as a significant political issue and therefore a concern with the general public Special interest groups are spinning messages which are inaccurate or biased in order to confuse parents and the public Therefore a transformative educational initiative developed on sound principles is

jeopardized because special interest groups including politicians seeking to garner support from these groups are taking positions based on inaccurate information This book will show that Common Core is a necessary initiative for achieving America's Race to the Top

Charting Reform, Achieving Equity in a Diverse Nation Gail L. Sunderman, 2013-05-01 This book examines what equity means in a nation where the schools are becoming more diverse The authors consider how well our educational reform policies often framed in the language of equity and opportunity measure up to the challenges of achieving equity in a diverse nation While there is growing awareness of the increasing racial ethnic and socioeconomic diversity of the nation there is little recognition of how these trends affect the schools particularly in formerly homogeneous communities At the same time inequalities in student achievement between different racial ethnic and socioeconomic groups persist even as educational policy has intensified the focus on the achievement gap These two challenges make definitions of equity and opportunity as urban problems obsolete and call for a critical examination of educational policy and reform from an equity perspective Central themes include the critical examination of how equity is conceived under the law and in policy the experiences of minority students in suburban schools and the impact of current reform policies and strategies for achieving greater educational opportunities for all students This book is designed for graduate and undergraduate courses in educational policy and policy analysis for policymakers interested in a critical examination of current reform policies and options and educational leaders and administrators struggling with the implementation of reform mandates From a policy perspective it includes a survey of the evolution of educational policies and reforms since the 1960s and traces the mix of legal and legislative legacies that have informed educational policy and equity It describes how trends in suburban diversification affect the schools something that has largely escaped the attention of educational reformers It provides school based and non school based remedies for achieving equity in diversifying suburban communities and articulates alternatives to the current accountability for performance approach It offers new and innovative analyses of current approaches to school reform including an analysis of how accountability tests can create the illusion of reducing the achievement gap and an examination of the paradoxes of federally funded compensatory policies that incorporate market based strategies Novel approaches such as social emotional learning and placed based college access strategies are examined through an equity lens
