

16. A business must provide an income statement to the government as part of their annual income tax return, which helps the government calculate the amount of income tax the business owes.
17. Drawings are not included on the income statement because they are not always directly related to earning revenue or to supporting revenue-making activities.
18. A chart of accounts is a list of the ledger accounts and their account numbers in ledger order.
19. This text uses a three-digit account numbering system. Assets are numbered in the 100s. Liabilities are numbered in the 200s. Capital and Drawings are numbered in the 300s. Revenues are numbered in the 400s. Expenses are numbered in the 500s.
20. An asset account normally has a debit balance. A liability account normally has a credit balance. A Revenue account normally has a credit balance. An Expense account normally has a debit balance. The Drawings account normally has a debit balance. The Capital account normally has a credit balance.
21. The Capital account will normally contain the beginning equity figure and new investments from the owner.

SECTION 5.1 EXERCISES (page 141)

Exercise 1, p. 141

- A.
- The heading should use Mayfare Plumbing instead of the owner's name.
 - Mayfare Plumbing should be the first line in the heading.
 - Income Statement should be the second line of the heading.
 - The third line of the heading should have Year Ended before the date, since it covers a period of time not a single date.
 - The Capital account should not be listed on the income statement.
 - There is only one revenue account, so the revenue total should be listed in the right column on the same line as Sales and Service.
 - Add a blank line between Total Revenue and Operating Expense
 - The Drawings account should not be included on the income statement.
 - Gas and Oil should be written as Gas and Oil Expense.
 - Utilities should be written as Utilities Expense.
 - Total expenses should be \$32 512.62.
 - Net income should be \$74 896.38.
 - Change Net Profit to Net Income.

Mosaic 1 Writing Instructor's Manual 4/E MCGRAWHILL 2002 **Reading Instructor's Manual to Accompany**
Mosaic MCGRAWHILL 2001-12 Interactions Mosaic 4th Edition is the newly expanded five level four skill comprehensive ESL ELT series for academic students The new edition for beginners to advanced learners incorporates interactive and communicative activities while still focusing on skill building to prepare students for academic content Reading Writing Listening and Speaking as well as Grammar are thoroughly presented in each strand High interest themes are integrated across all skill strands and levels Language proficiencies as well are articulated from level to level The Instructor's Manual one for each student book provides new expanded activities user friendly instructions Placements Tests Chapter Quizzes and corresponding Answer Keys *Number Mosaics* Adi R. Kanga, 1995 Number Mosaics has little in common with most other books of recreational mathematics Though it contains much for the reader to marvel at and wonder about it is far from being just another book of mind bending puzzles It is more in the nature of a story of discovery and adventure in hitherto unexplored regions of the fascinating universe of numbers and patterns As the story unfolds the reader is drawn into it and soon becomes a member of the exploring party The problems which feature in the book are intriguing in themselves but the focus is not so much on obtaining the right answers as on the numerous and ingenious ways of arriving at the solutions The approach adopted is similar to that often used in the past by old masters like Fermat Euler and Gauss to name a few The critical examination of raw data initially invokes a response in the form of a conjecture which is then refined and tested in wider and wider fields The book abounds with illustrative examples and illuminating diagrams and throughout it the search for universals continues like a powerful undercurrent as master keys are forged which work under all manner of changing conditions for solving a variety of problems often without the need for calculations This is a book which lovers of number lore will surely relish Land Mosaics Richard T. Basic Biology for Born Engineers Guenter Albrecht-Buehler,2018-10-19 Physics owes much of its success to the application of differential calculus Correspondingly most laws of physics are formulated as differential equations This success has created the prejudice that a science cannot be exact unless it stands firmly on a foundation of calculus This doesn t however work for biology Living things are not as continuous let alone differentiable as most organisms and their parts change or end quite abruptly Biology cannot offer differential equations for say the role of chromosomal telomeres in aging or a link between macrophage polyploidy and cancer The information flow between the limbic system and the frontal cortex is far too erratic to permit differentiation The pheromone secretions that control the social order of ants follow no mathematical laws The topology of the human skeleton is neither a perfect sphere nor an idealized doughnut However all these and countless other biological phenomena decide life and death and are amazingly exact As such instead of even trying to paint living things with the exquisitely resolving brush of differential calculus we may accept that they are actually made up of individual and sizable pixels Hence this book presents a novel view of biology as the unified science of living mosaics which consist of discrete yet interacting tiles which in turn are such mosaics in their own rights
