Science is unique among the disciplines since it is inherently hands on. However, the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences to secondary students in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning (Killham et al 2014; Wong et al 2018), PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments (Molnar et al 2021; Seaman et al 2018). This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy (Brigido Borrachero Bermejo Gunning Duran Duran 2004). Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation.

Innovation-Based Development of the Mineral Resources Sector: Challenges and Prospects Vladimir Litvinenko, 2018-10-11

Innovation Based Development of the Mineral Resources Sector: Challenges and Prospects contains the contributions presented at the XI Russian German Raw Materials Conference, Potsdam, Germany, 7-8 November 2018. The Russian German Raw Materials Conference is held within the framework of the Permanent Russian German Forum on the Issues of the Use of Raw Materials, which has as goals to develop new approaches to effectively use energy, mineral, and renewable natural resources and to initiate cooperation in the field of sustainability and environmental protection. The contributions cover current trends in the development of raw materials markets and the world economy, the state of the environment, and new technologies applied in the sector, effectively responding to modern challenges. The 63 accepted papers are grouped into four main sections: Mineral exploration and mining; Mining services; Processing of raw materials; Other. *Innovation Based Development of the Mineral Resources Sector: Challenges and Prospects* will be of interest to academics and researchers involved in the mineral resources sector but also to professionals in the public, foreign trade, and education fields and representatives of major corporations and professional associations.
