## **Green Book For Science Zimbabwe:**

The Green Book ,2004      **Land and Agrarian Reform in Zimbabwe** Sam Moyo,Walter Chambati,2013-05-13 The Fast Track Land Reform Programme implemented during the 2000s in Zimbabwe represents the only instance of radical redistributive land reforms since the end of the Cold War It reversed the racially skewed agrarian structure and discriminatory land tenures inherited from colonial rule The land reform also radicalised the state towards a nationalist introverted accumulation strategy against a broad array of unilateral Western sanctions Indeed Zimbabwe's land reform in its social and political dynamics must be compared to the leading land reforms of the twentieth century which include those of Mexico Russia China Japan South Korea Taiwan Cuba and Mozambique The fact that the Zimbabwe case has not been recognised as vanguard nationalism has much to do with the intellectual structural adjustment which has accompanied neoliberalism and a hostile media campaign This has entailed dubious theories of neopatrimonialism which reduce African politics and the state to endemic corruption patronage and tribalism while overstating the virtues of neoliberal good governance Under this racist repertoire it has been impossible to see class politics mass mobilisation and resistance let alone believe that something progressive can occur in Africa This book comes to a conclusion that the Zimbabwe land reform represents a new form of resistance with distinct and innovative characteristics when compared to other cases of radicalisation reform and resistance The process of reform and resistance has entailed the deliberate creation of a tri modal agrarian structure to accommodate and balance the interests of various domestic classes the progressive restructuring of labour relations and agrarian markets the continuing pressures for radical reforms through the indigenisation of mining and other sectors and the rise of extensive albeit relatively weak producer cooperative structures The book also highlights some of the resonances between the Zimbabwean land struggles and those on the continent as well as in the South in general arguing that there are some convergences and divergences worthy of intellectual attention The book thus calls for greater endogenous empirical research which overcomes the pre occupation with failed interpretations of the nature of the state and agency in Africa      Integral Green Zimbabwe Elizabeth Mamukwa,Ronnie Lessem,Alexander Schieffer,2016-05-23 Integral Green Zimbabwe An African Phoenix Rising by Ronnie Lessem Alexander Schieffer and Liz Mamukwa is the first book in the Integral Green Society and Economy series a series which has three overarching aims The first aim is to link together two major movements of our time one philosophical the other practical The philosophical movement is towards what many today are calling an integral age while the practical is the green movement duly aligned with that of sustainable development The second is to blend together elements of nature and community culture and spirituality science and technology politics and economics thus serving to bring about an integral green vision albeit with a focus on business and economics As such the authors transcend the limitations to sustainable development and environmental economics which are overly ecological if not also technological in orientation and exclude social and cultural elements Thirdly this particular volume focuses specifically

on Zimbabwe as well as Southern Africa drawing on the particular issues and capacities that this country and region represents The emphasis on Zimbabwe and Southern Africa transpired not only because two of the editors Lessem and Mamukwa are Zimbabwean in origin but because Zimbabwe is today like a phoenix rising from the ashes and has the opportunity to recreate itself anew

**Power in Contemporary Zimbabwe** Erasmus Masitera, Fortune Sibanda, 2018-04-20

In recent years the Zimbabwe crisis rendered the country and its citizens to be a typical case of failed states the world over Zimbabwean society was and is still confronted with different challenges which include political economic and social problems Attempts to overcome these challenges have thrown light on the power that rests within individuals and or groups to change and even revolutionize their localities communities states and ultimately the world at large Through experience individuals and groups have promoted ideas that have aided in changing mentalities attitudes and behaviors in societies at different levels This book brings together contributors from various academic disciplines to reflect on and theorize the contours of power including the intrinsic and or extrinsic models of power which pertain to individuals communities and or groups in order to transform society Reflections are on various groups such as political movements environmental movements religious groups advocacy groups gender groups to mention but a few as they struggle against marginalization discrimination exploitation and other forms of oppression showing their agency or compliance

*Integral Dynamics* Ronnie Lessem, Alexander Schieffer, Samuel D. Rima, 2016-05-23 The theory of integral dynamics is based on the view that the development of individual leaders or entrepreneurs requires the simultaneous development of institutions and societies It seeks a specific way forward for each society fundamentally different from but drawing on its past Nearly every natural science has been transformed from an analytically based approach to a dynamic one now it is time for society and culture to follow suit locally and globally Each culture discipline and person is incomplete and is in need of others in order to develop and evolve This book sets out a curriculum for a new integral trans cultural and trans disciplinary area of study inclusive of but extending beyond economics and enterprise It embraces a trans personal perspective linking self with community enterprise and society and focusing on the vital relationship between local identity and global integrity For the government policy maker the enlightened business practitioner and the student and researcher into economics and enterprise the new discipline is set out here in complete detail by a multi national team of Gower's Transformation and Innovation Series authors Illuminated with examples relating the conceptual to the practical this is a text not for a pre modern modern or even post modern era but for what has been called our trans modern age
