The Gregg Reference Manual William A. Sabin,1999 The Gregg Reference Manual is a handbook of grammar usage primarily intended for office administration students. Students in this market spend most of their time editing reports and letters for grammar style and format. With the Gregg manual students become proficient at editing business communication through the instruction on grammar spelling usage and have exercises to refine their skills in the accompanying worksheets. This edition has been updated to include only references to word processing software while eliminating mention of the typewriter. While the emphasis is on grammar there is some instruction on general office procedures dictating filing. The

1984 the weak writing in a scientific report made national news. The report which outlined safety procedures during a nuclear attack advised industrial workers to don heavy clothes and immerse themselves in a large body of water. The logic behind this advice was sound. Water is a good absorber of heat neutrons and gamma rays. Unfortunately the way the advice was worded was unclear. Was everyone supposed to come up for air? Be completely submerged? The writing conveyed the wrong impression to the public. The report came across as saying go jump in a lake not the impression you want to give someone spending thousands of dollars to fund your research. Chances are that Dan Rather will not quote your documents on national television. Still your writing is important. On a personal level your writing is the way in which people learn about your work. When you communicate you receive credit for your work. When you do not communicate or are too slow to communicate the credit often goes to someone else. On a larger level your writing and the writing of other scientists influence public policy about science and engineering. *The Gregg Reference Manual 8th Ed* William A.
