Gripping Gap Question Book:

Biofuels, Land Grabbing and Food Security in Africa Atakilte Beyene, Prosper B. Matondi, Kjell Havnevik, 2011-06-09
The issue of biofuels has already been much debated but the focus to date has largely been on Latin America and deforestation this highly original work breaks fresh ground in looking at the African perspective Most African governments see biofuels as having the potential to increase agricultural productivity and export incomes and thus strengthen their national economies improving energy balances and rural employment At the same time climate change may be addressed through reduction of green house gas emissions There are however a number of uncertainties mounting that challenge this scenario Using cutting edge empirical case studies this knowledge gap is addressed in a variety of chapters examining the effects of large scale biofuel production on African agriculture In particular land grabbing and food security issues are scrutinised both of which have become vital topics in regard to the environmental and developmental governance of African countries A revealing book for anyone wishing to understand the startling impact of biofuels and land grabbing on Africa

Natural Resources Grabbing: An International Law Perspective Francesca Romanin Jacur, Angelica Bonfanti, Francesco Seatzu, 2015-10-14 The growing demand for natural resources has triggered a race to their exploitation and possession especially in developing countries Most desired are water land forests raw materials oil gas mineral and precious stones fisheries and genetic resources Emerging economies Western states multinational corporations and international financial institutions have become the biggest buyers in a race that on one hand strengthens economies and creates investment opportunities and on the other threatens local communities and environmental protection *Natural Resources Grabbing An International Law Perspective* aims at filling a gap in the legal literature by addressing the adverse effects that large scale investments in natural resources may pose to fundamental human rights and the protection of the environment

Prehension Colin McGinn, 2017-08-11 In praise of the hand A philosopher considers the crucial role of the hand in human evolution particularly with respect to language McGinn is an ingenious philosopher who thinks like a laser and writes like a dream Steven Pinker This book is a hymn to the hand In *Prehension* Colin McGinn links questions from science to philosophical concerns to consider something that we take for granted the importance of the hand in everything we do Drawing on evolutionary biology anatomy archaeology linguistics psychology and philosophy among other disciplines McGinn examines the role of the hand in shaping human evolution He finds that the development of our capacity to grasp to grip to take hold also known as prehension is crucial in the emergence of *Homo sapiens* The human species possesses language rational thought culture and a specific affective capacity but there was a time when our ancestors had none of these How did we become what we so distinctively are given our early origins McGinn following Darwin and others calls the hand the source of our biological success When our remote ancestors descended from trees they adopted a bipedal gait that left the hands free for other work they began to make tools which led to social cooperation and increased brain capacity But McGinn goes

further than others in arguing for the importance of the hand he speculates that the hand played a major role in the development of language and presents a theory of primitive reference as an outgrowth of prehension McGinn sings the praises of the hand and evolution in a philosophical key He mixes biology anthropology analytical philosophy existential philosophy sheer speculation and utter amazement to celebrate humans achievement of humanity

Grabbing Back Alexander Reid Ross, 2014-06-09 Land grabs are a global phenomenon of our times driven by the ever increasing demands of both global corporations and the governments with which they are allied But as this powerful and timely book demonstrates ordinary citizens small farmers and ordinary citizens around the world are standing up to defend their own with passion and ingenuity and they are recording successes that are both extraordinary and inspiring Oliver Tickell Editor The Ecologist Climate change ravages the earth while wealthy elites try to grab as much of the world's diminishing resources as possible As Vandana Shiva writes land is life But land and the struggle to possess it is also power colonial and corporate power to be sure but also the power of the dispossessed to rise up and call for an end to the global land grab Grabbing Back maps this struggle bringing together analyses that uncover the politics of cultivation and control In this unprecedented collection on the ground activists join forces with critically acclaimed scholars to document the commodification and consumption of space from foreclosed homes to annihilated rainforests from ecotourism in Sri Lanka to

the tar sands of Montana and to outline the strategies and tactics that might the destruction With contributions by Vandana Shiva Noam Chomsky Max Rameau Grace Lee Boggs Michael Hardt Ahjamu Umi Ben Dangl and many others More Praise for Grabbing Back Part of the reason that knowledge about the current global land grab is so uncertain is the paucity of perspectives and analysis in defining the problem This book fills the gap admirably Raj Patel author of Stuffed and Starved The acquisition control and exploitation of land as well as the simultaneous dispossession of land based and peasant communities is central to the processes of both colonialism and capitalism As Fanon reminds us egalitarian governance and stewardship of land is fundamental to the struggle for liberation and self determination for all oppressed peoples This makes Grabbing Back a necessary study for anticapitalist and anticolonial movements Harsha Walia author of Undoing Border Imperialism Grab back this sparkling mosaic of essays as a treasure of our new old knowledge commons Together these pieces replace dichotomies with dialectics making explicit the inseparability of land and collective life Together they restore the vital concept of social ecology in resistance to relentless and increasingly apocalyptic capitalism with emphasis on its second contradiction its impossibility on a finite resource base Maia Ramnath author of Decolonizing Anarchism As the forces of thanatos leave no stone unturned in their quest to dominate the entire planet this anthology provides a much needed antidote Weaving together accounts from around the world the authors advocate building grassroots movements aimed at subverting capital s incessant assault on our lives and land George Katsiaficas author of Asia s Unknown Uprisings Never perhaps has the land question been so crucial for anti capitalist movements as we are witnessing a global process of enclosure that privatizes lands waters forests displacing millions from their homes and placing monetary gates to what we rightly considered our commonwealth It is essential then that we understand what motivates this drive and its effects in all their social and spatial dimensions Grabbing Back takes us through this process identifying the reasons and actors behind this global land grab and most important introducing us to the struggles that people are making across the world to resist being evicted from their lands and to reclaim the earth George Caffentzis Committee for Academic Freedom in Africa
