Jsc 2014 Global Studies Question Sheet

Daniel F McAuley

Jsc 2014 Global Studies Question Sheet:

The Report: Jordan 2014 Oxford Business Group, 2014-10-30 A number of Jordan's key economic indicators have improved over the last year and GDP is forecast to grow by 3.5% in 2014. Jordan's reliance on energy imports is being addressed with increased focus on domestic oil shale reserves and nuclear energy while plans to build a pipeline through the country from Iraq will provide a stable oil supply at discounted rates. Jordan's expanding population has put pressure on state services particularly health where the private sector is expected to play an increasingly prominent role. Tourism revenues rose in 2014 and with the unveiling of a new arrivals terminal at Aqaba International Airport and plans for a national rail network these are expected to rise further in the coming years. All in all continued political stability, large scale transportation developments, the availability of a young educated workforce and government efforts to reduce the fiscal deficit and the country's reliance on energy imports should ensure Jordan maintains its strong position in the region. Archaeology and Heritage of the Human Movement into Space Beth Laura O'Leary, P. J. Capelotti, 2014-08-30 This volume addresses the creation, documentation, preservation and study of the archaeology of lunar, planetary and interstellar exploration. It defines the attributes of common human technological expressions within national and increasingly private exploration efforts and explores the archaeology of both fixed and mobile artifacts in the solar system and the wider galaxy. This book presents the research of the foremost scholars in the field of space archaeology and heritage, a recent discipline of the field of Space Archaeology and Heritage. It provides the emerging archaeological perspective on the history of the human exploration of space. Since humans have been creating a vast archaeological preserve in space and on other celestial bodies, this assemblage of heritage objects and sites attests to the human presence off the Earth and the study of these material remains are best investigated by archaeologists and historic preservationists. As space exploration has reached the half-century mark, it is the appropriate time to reflect on the major events and technological development of this particular, unique 20th-century arena of human history. The authors encapsulate various ways of looking at the archaeology of both fixed and mobile human artifacts in the solar system. As missions continue into space and as private ventures gear up for public and tourist visits to space and to the Moon and even Mars, it is the appropriate time to address questions about the meaning and significance of this material culture. **Credit, Consumers and the Law** Karen Fairweather, Paul O'Shea, Ross Grantham, 2016-10-14 Consumer law, particularly consumer credit law, is characterised by increasingly complex regulation in Western economies. Drawing together authors from all of these jurisdictions, this book analyses and evaluates these initiatives and makes predictions as to their likely success and possible flaws.
