The Roles of Technology and Globalization in Educational Transformation Adeoye, Blessing F., Arome, Gladys, 2019-08-16
The emergence of the internet and developments in educational software have changed the way teachers teach and the way students learn. There has been a substantial increase in the quantity, quality, and diversity of educational material available over the internet or through the use of satellite video and audio linkups. These technologies have allowed new learning methods and techniques to reach a greater geographic region and have contributed to the global transformation of education. *The Roles of Technology and Globalization in Educational Transformation* is an essential academic book that provides comprehensive research on issues concerning the roles of technology and globalization in educational transformation and the challenges of teaching and learning in various cultural settings and how they were resolved. It will support educational organizations that wish to find, create, or adapt technology for use in their institution. Featuring a broad range of topics such as public administration, educational technology, and higher education, this book is essential for teachers, deans, principals, school administrators, IT specialists, curriculum developers, instructional designers, higher education staff, academicians, policymakers, researchers, and students. *Journal of Arts and Social Sciences Update*, 2011

Curriculum Renewal for Islamic Education Nadeem A. Memon, Mariam Alhashmi, Mohamad Abdalla, 2021-05-10
This book demonstrates why and how it is necessary to redesign Islamic Education curriculum in the K-12 sector globally. From Western public schools that integrate Muslim perspectives to be culturally responsive to public and private schools in Muslim minority and majority contexts that teach Islamic studies as a core subject or teach from an Islamic perspective, the volume highlights the unique global and sociocultural contexts that support the disparate trajectories of Islamic Education curricula. Divided into three distinct parts, the text discusses current Islamic education curricula and considers new areas for inclusion as part of a general renewal effort that includes developing curricula from an Islamic worldview and the current aspirations of Islamic education globally. By providing insights on key concepts related to teaching Islam, case studies of curriculum achievements and pitfalls, and suggested processes and pillars for curriculum development, contributors present possibilities for researchers and educators to think about teaching Islam differently. This text will benefit researchers, doctoral students, and academics in the fields of secondary education, Islamic education, and curriculum studies. Those interested in religious education as well as the sociology and theory of religion more broadly will also enjoy this volume.
