Our Money Leah Downey, 2024-12-10 How the creation of money and monetary policy can be more democratic The power to create money is foundational to the state In the United States that power has been largely delegated to private banks governed by an independent central bank Putting monetary policy in the hands of a set of insulated nonelected experts has fueled the popular rejection of expertise as well as a widespread dissatisfaction with democratically elected officials In *Our Money* Leah Downey makes a principled case against central bank independence CBI by both challenging the economic theory behind it and developing a democratic rationale for sustaining the power of the legislature to determine who can create money and on what terms How states govern money creation has an impact on the capacity of the people and their elected officials to steer policy over time In a healthy democracy Downey argues the balance of power over money creation matters Downey applies and develops democratic theory through an exploration of monetary policy In so doing she develops a novel theory of independent agencies in the context of democratic government arguing that states can employ expertise without being ruled by experts Downey argues that it is through iterative governance the legislature knowing and regularly showing its power over policy that the people can retain their democratic power to guide policy in the modern state As for contemporary macroeconomic arguments in defense of central bank independence Downey suggests that the purported economic benefits do not outweigh the democratic costs
