1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

Abstract

Results from several studies suggest that the results presented in this paper are robust to the various assumptions made in the model. However, the results are sensitive to the choice of the discount rate. A higher discount rate would lead to a higher value of the optimal investment. A lower discount rate would lead to a lower value of the optimal investment.

These questions pertain to the subject: current all questions for which answers have been provided are marked as "answered" and are highlighted in yellow. All other questions are marked as "unanswered" and are highlighted in white.
