The Historical Novel, Transnationalism, and the Postmodern Era Susan Brantly, 2017-02-17 This volume explores the genre of the historical novel and the variety of ways in which writers choose to represent the past How does an author's nationality or gender impact their artistic choices To what extent can historical novels appeal to a transnational audience This study demonstrates how histories can communicate across national borders often by invoking or deconstructing the very notion of nationhood Furthermore it traces how the concerns of the postmodern era such as postmodern critiques of historiography colonialism identity and the Enlightenment have impacted the genre of the historical novel and shows this impact has not been uniform throughout Western culture Not all historical novels written during the postmodern era are postmodern The historical novel as a genre occupies a problematic yet significant space in Cold War literary currents torn between claims of authenticity and the impossibility of accessing the past Historical novels from England America Germany and France are compared and contrasted with historical novels from Sweden testing a variety of theoretical perspectives in the process This pitting of a center against a periphery serves to highlight traits that historical novels from the West have in common but also how they differ The historical novel is not just a local regional phenomenon but has become during the postmodern era a transnational tool for exploring how we should think of nations and nationalism and what a society should or should not look like

Transforming Otherness Peter Nynas, 2017-07-28 Today people in different situations and contexts face intercultural challenges These are a result of increasing mobility Sometimes such challenges are brought about by crisis situations and an international labor market However people also come in contact with each other through forms of new technology such as the Internet and through literature and film In these multicultural encounters misunderstandings and sometimes clashes are experienced This volume presents studies in culture

communication and language all of which strive through a variety of theoretical perspectives to develop understanding of such challenges and perhaps offer practical solutions Encountering otherness may evoke fears negative attitudes and a corresponding will to dismiss the otherness in front of us either consciously or unconsciously This denial of otherness may also be subtle Thinking about otherness as described in this volume also raises questions about how otherness is represented and mediated and about the possible role of third parties in facilitating communication in such situations Sometimes a third party can play a crucial role in facilitating the communication process and serve as a channel of communication Trust in humanity as a bridge to community requires a subtle balance between representations of self and other Various problems arise in intercultural mediation which may be caused by cultural and political differences and these are sometimes used to validate stereotypical beliefs and images The editors argue that in both academic and art circles European perspectives have widely been understood as universal
