War Department,1946 **Advances in GAPDH Protein Analysis: A Functional and Biochemical Approach** Shanmugasundaram Ganapathy-Kanniappan,2018-01-16 This book presents modern and classic

analytical approaches that are crucial for the biochemical and functional characterization of the archetypal protein glyceraldehyde 3 phosphate dehydrogenase GAPDH. The distinguishing feature of the book is that it covers in addition to other methods some of the uncommon but valuable techniques as well. For example in gel visualization of enzyme activity immunoblotting protocols for native non denatured proteins and proteins resolved by pH gradient IEF isoelectrofocusing etc. These expedient methods are relevant and vital for the verification of biochemical properties of GAPDH or similar protein of interest. This work outlines detailed protocols that are essential to investigate classical cellular and recently reported extracellular secretory isoforms of GAPDH. Precisely the book covers techniques pertinent to enzymatic and non enzymatic analysis of GAPDH that include but not limited to electrophoretic mobility shift assay EMSA two dimensional 2D immunoblotting immunofluorescence confocal microscopy mass spectrometry ion exchange and affinity chromatography. Readers will discover the importance of the experimental methods described in the book as they relate to the evaluation of the role and significance of GAPDH. Furthermore majority of the methods described in the book have also been validated in the author's laboratory besides other research groups worldwide underlining the repeatability and reproducibility of the protocols. Each method begins with an abstract and a brief background emphasizing its application and relevance. This will enable the readers to determine the choice of experimental design according to their research objectives. The book explains the methods systematically with ample illustrations to facilitate quick and easy comprehension of the practical knowledge. Although the book is focused on GAPDH many of the protocols may be adopted to other proteins or enzymes with minimal modifications. Noteworthy it is unequivocally established that GAPDH is a multifunctional protein involved in several cellular processes of health disease conditions. Hence this book will be a valuable practical guide for young researchers scientists and clinician scientists.
