**New Impulses in Word-Formation** Susan Olsen, 2016-10-31 This special issue entitled New Impulses in Word Formation demonstrates in thirteen individual empirically oriented case studies how the methods gleaned from newer theoretical models optimality theory construction grammar cognitive grammar distributive morphology parallel architecture as well as from the linguistic sub disciplines of psycholinguistics neurolinguistics corpus linguistics and computational linguistics can be applied lucratively to the field of word formation The individual contributions are from a team of international linguists and deal with a broad spectrum of interests divided almost equally between the two major areas of word formation derivation and composition

**Cognitive Modelling in Language and Discourse across Cultures** Annalisa Baicchi, Erica Pinelli, 2017-08-21 This volume deals with core issues in figurative language and figurative thought It also explores areas of convergence between idealised cognitive models and language across fourteen European and non European languages Croatian English German Greek Italian Japanese Persian Polish Russian Old Saxon Sicilian Spanish Swedish and Turkish The collection foregrounds the relationship that holds between literalness and figurativeness in meaning construction it emphasises the role of conceptual metonymy and metaphor as the main cognitive tools at work in inferential activity and as generators of discourse ties and it also depicts the import of cognitive models in the production and interpretation of multimodal communication In addition a number of more specific topics are addressed from different perspectives such as language variation and cultural models the argumentative role of metaphor in discourse and the role of empirical work in cognitive linguistics

**The Foundations and Versatility of English Language Teaching (ELT)** Christoph Haase, Natalia Orlova, Joel Cameron Head, 2018-12-14 While the field of ELT studies sees continued horizontal and vertical diversification it is also time to take stock of what has made the discipline the field it presents itself as today As horizontal diversification we can identify trends that involve a continued inclusion of more fields of study into the family of methods and approaches of ELT Especially in the technical sense e learning has matured and new forms of online learning and teaching have emerged be it via teleconferences or short message services for vocabulary training However a massive extension has occurred within the so called social media The vertical dimension affects a depth of analysis not seen even a decade ago when for example small and relatively simple learner corpora were used for linguistic analysis that rarely went beyond rote frequency counts The increasing sophistication in these two dimensions is also reflected in the research papers collected in this volume

**Creativity in Word Formation and Word Interpretation** Livia Körtvélyessy, Pavol Štekauer, Pavol Kačmár, 2022-02-03 The pioneering new study presents an interdisciplinary examination of how we use creativity to form and interpret new words

Sánchez Fajardo, 2022-02-15 The book is a research monograph that reviews and revises the concept of linguistic pejoration and explores the role of 15 suffixes and combining forms such as *-ie* *-o* *-ard* *-holic* *-rrhea* *-itis* *-porn* *-ish* in the formation of English pejoratives The examination of the inner structure of the resulting derivatives is based on an innovative methodology that encompasses the theories and approaches of Construction Morphology Componential Analysis and Morphopragmatics Following the principles of this methodology pejorative words collected from dictionaries and corpora a total of approximately 950 words are abstracted into generalizations or constructional schemas where structural and functional similarities are used to cognitively trace the ways in which negative or derisive meaning is connected with a specific form Through this multifaceted methodology my analysis

**English** Alexander Tokar, 2017-11-13 This monograph is concerned with the question of why some English words have more than one stress pattern E g overt vs o vert pulsate vs pul sate etc It is argued that cases such as these are due to the fact that the morphological structure of one and the same English word can sometimes be analyzed in more than one way Thus overt is the stress pattern of the suffixation analysis over t whereas o vert is due to the prefixation analysis o vert cf covert Similarly pulsate is simultaneously pulse ate i e a suffixed derivative and a back derivative from pul satance Tokar s approach in the use of both dictionary OED and corpus data YouTube holds promise of a scholarly breakthrough on the vital linguistic prosodic topic of English stress assignment of doublets and of stress assignment in general Irmengard Rauch Professor of
