#### INTRODUCTION

These instructions, when used with the appropriate owner and operator's manuals, and instructions, provide complete information for installation, adjustment, operation and maintaining a Morse "CR" control system.

The slide-mounted Model "CR" provides remote control of both thrust and direction for engines equipped with synchronizing transmissions. The Morse "Red-Jack" push-pull cables which connect the control head to the engine and transmission are engineered especially for use with Morse controls to ensure smooth, instant response to movement of the control levers.

When determining the length of cables, choose the most direct path from the control head to the engine and thrust levers. Bends in the cable path must not be smaller than 9" radius.
