**The Economical Environmentalist** Prashant Vaze, 2009

Reducing your carbon emissions in an economic down turn can be challenging but saving the planet doesn't have to cost you more. Tough economic times need not relegate concerns for the planet to the back burner. The author is an environmental economist trying to live a low carbon life in London. He worked for 15 years in the UK's Office of Climate Change, the Prime Minister's Strategy Unit and the Department of the Environment. So far so good. But he has kids. A family to visit in India. A hectic job. In distilling and building on his own experience of trying to live a low carbon life, he helps us navigate the choices that confront us all: families, singletons, pensioners when making decisions about what to eat, what to buy, how to travel and how to keep warm in the era of climate change and economic turmoil. He works out the sums and lets us know which choices will make the biggest difference and which are false savings. His book is an irreverent but seriously rigorous reference guide to low cost, low carbon living for everyone in any location in tough times. It's brimming with up to date information on current and future technologies, tips and ideas for every budget on how to spend the least for the biggest carbon reduction gain and insight from the experiences of people trying to live low carbon lives.

*Volvo Model by Model* Martin Tilbrook, 2023-09-14

The book invites the reader, both Volvo fans and those with a more general interest in motoring, on board the company's landmark cars. Volvo Model by Model brings Volvo to life with the feel of the cars from behind the wheel, from the side valve V4 to the electric C40, with legends like the 240, the XC90 and the 850 in between. Volvo's marketing strategies from safety to sporty and back again are examined with thoughts from contemporary road tests. So buckle up, your Volvo patented three point safety belt and prepare for the ride. In the 2020s, Volvo is undergoing a resurgence, gaining mainstream desirability with record sales for six consecutive years. There is also huge interest in wider Scandinavian culture and design. Volvo Model by Model is a new look at the cars and cultural impact of Volvo. Always daring to be different, no other car manufacturer encapsulates its home nation so completely, accounting for one third of the Swedish dream. Villa Volvo. Vovve Volvo. Volvo started in 1927 but the open topped V4 didn't sell well in the harsh Swedish climate. This was a rare misstep, although there have been some challenging aesthetics on the way, like the 760. Volvo survived a failed marriage with Ford, which still produced one of the company's all time best sellers. Volvo now has another home, China. Parent company Geely enables Volvo to freely express its Scandinavian style and today's slick Swedes were voted the best designed range of cars by British motorists. Concept Recharge points the way to an electric future.

**Case Studies in Marketing Management** S. Ramesh Kumar, 2012

**Reducing Carbon Emissions from Transport** Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2006-08-07. The Committee's report examines the challenges involved in efforts to reduce carbon emissions from the UK transport sector and makes recommendations to improve future progress as part of its overall priority for the current Parliament of focusing on climate change issues. Topics discussed include the Government's strategic priorities, measures to reduce carbon emissions from road transport, trains, water freight and aviation, emissions from developing economies, the

future price and availability of oil The report finds that reducing carbon emissions from transport is particularly challenging given its dependence on oil with transport being the only sector of the UK economy in which carbon emissions were higher in 2004 than the baseline year of 1990 and projected emissions likely to be higher in 2020 than in 1990 Amongst the report's 66 conclusions and recommendations the Committee raises concerns over the lack of consistency and accuracy in methods used by the Government to calculate emissions projections and highlights the need for more decisive action to actively encourage modal shift towards lower carbon modes of transport such as trains buses and low carbon cars and lorries and to discourage marginal car and plane journeys It recommends the introduction of a national road user charging scheme as soon as technically possible and a new policy to enforce speed limits and an increase in air passenger duty APD and taxes on domestic flights The report also calls for better local rail services and the need to make rail fare and ticketing structures simpler and more transparent in order to encourage greater use of rail services and the need for a public information campaign to raise awareness about the reality and dangers of climate change and a cross party approach to the measures required to tackle it
