

FUEL TANK, FUEL LINES, AND FUEL FILTER AND SEDIMENT BOWL

The fuel lines run from the tank outlet to the fuel pump, to the fuel filter and sediment bowl, and then to the carburetor.

The fuel filter and sediment bowl is located between the fuel pump and carburetor. The bowl traps condensation and dirt particles that flow through the fuel lines from the tank.

B. ADJUSTMENTS

CARBURETOR ADJUSTMENTS

There are two adjustments on the gasoline carburetor as shown in Figure 26. They are the idle fuel adjustment and the idle speed adjustment.

PRELIMINARY ADJUSTMENT

1. Set the idle speed adjustment screw so the throttle plate is slightly open.
2. Turn the idle fuel adjustment needle in until it is lightly seated and back off one full turn.
3. Make sure that the fuel tank shut-off valve is in the "ON" position.
4. Pull the choke knob, turn on the ignition, start the engine, and push the choke knob part way in until the engine runs smoothly.
5. After the engine has reached normal operating temperature, push the choke knob all the way in.

FINAL ADJUSTMENTS

1. Turn the idle fuel adjustment needle out (counter-clockwise) until the engine begins to "roll" from too rich a mixture, then turn it inward slowly until the engine is running smoothly.
2. With the hand throttle in the closed position (fully forward), turn the idle speed adjustment screw until the engine low idle speed is at the specified rpm. On new engines, it may be necessary to set the low idle speed slightly higher for the first few hours to prevent stalling.

8-277

Figure 26
Carburetor Controls

1. Idle Speed Adjustment Screw
 2. Throttle Plate Arm
 3. Choke Bracket and Screw
 4. Set Screw
 5. Fuel Inlet Fitting
 6. Idle Fuel Adjustment Needle
3. With the hand throttle in the wide open position, adjust the stop screw on the throttle linkage bracket to obtain the specified maximum no-load rpm. (See "Specifications" — Chapter 5).
 4. If these adjustments cannot be obtained, it may be necessary to adjust the throttle linkage.

CARBURETOR AND GOVERNOR LINKAGE ADJUSTMENT

Ref. Figures 27 and 28

1. Stop the engine and move the hand throttle to the wide open position.
2. Loosen the jam nut on the governor rod, Figure 27, and disconnect the rod from the throttle plate lever at the carburetor.
3. Rotate the throttle plate lever to full open.
4. Move the governor arm toward the rear of the tractor to the wide open position.
