For instructors, it serves as an invaluable desk reference and teaching aid that goes far beyond typical dictionaries. For working managers, it offers a shared language with insights for improving any process and supporting any training program. It thoroughly covers accounting, customer service, distribution, business economics, finance, forecasting, human resources, industrial engineering, industrial relations, inventory management, healthcare management, Lean, Sigma, Six Sigma, lean thinking, logistics, maintenance, engineering management, information systems, marketing, sales, new product development, operations research, organizational behavior, management, personal time management, production planning and control, purchasing, reliability engineering, quality management, service management, simulation, statistics, strategic management, systems engineering, supply and supply chain management, theory of constraints, transportation, and warehousing. Multiple figures, graphs, equations, Excel formulas, VBA scripts, and references support both learning and application.
