Frankenstein - With Audio Level 3 Oxford Bookworms Library Mary Shelley, 2014-09-22 A level 3 Oxford Bookworms Library graded reader This version includes an audio book listen to the story as you read Retold for Learners of English by Patrick Nobes Victor Frankenstein thinks he has found the secret of life He takes parts from dead people and builds a new man But this monster is so big and frightening that everyone runs away from him even Frankenstein himself The monster is like an enormous baby who needs love But nobody gives him love and soon he learns to hate And because he is so strong the next thing he learns is how to kill *The Palgrave Handbook of Animals and Literature* Susan

McHugh, Robert McKay, John Miller, 2020-11-25 This volume is the first comprehensive guide to current research on animals animality and human animal relations in literature To reflect the history of literary animal studies to date its primary focus is literary prose and poetry in English while also accommodating emergent discussions of the full range of media and contexts with which literary studies engages especially film and critical theory User friendly language references even suggestions for further readings are included to help newcomers to the field understand how it has taken shape primarily through recent decades To further aid teachers sections are organized by conventions of periodization and chapters address a range of canonical and popular texts Bookended by sections devoted to the field's conceptual foundations and new directions the volume is designed to set an agenda for literary animal studies for decades to come **The Poetry of Erasmus Darwin**

Martin Priestman, 2016-02-24 While historians of science have focused significant attention on Erasmus Darwin's scientific ideas and milieu relatively little attention has been paid to Darwin as a literary writer In *The Poetry of Erasmus Darwin* Martin Priestman situates Darwin's three major poems *The Loves of the Plants* 1789 *The Economy of Vegetation* 1791 and *The Temple of Nature* 1803 and Darwin himself within a large polymathic late Enlightenment network of other scientists writers thinkers and social movers and shakers Interpreting Darwin's poetry in terms of Darwin's broader sense of the poetic text as a material space he posits a significant shift from the Enlightenment's emphases on conceptual spaces to the Romantic period's emphases on historical time He shows how Darwin's poetry illuminates his stance toward all the major physical sciences and his well formulated theories of evolution and materially based psychology Priestman's study also offers the first substantial accounts of Darwin's mythological theories and their links to Enlightenment Rosicrucianism and Freemasonry and of the reading of history that emerges from the fragment poem *The Progress of Society* a first ever printed edition of which is included in an appendix Ultimately Priestman's book offers readers a sustained account of Darwin's polymathic Enlightenment worldview and cognate poetics in a period when texts are too often judged by their adherence to a retrospectively constructed Romanticism **Imagination and Science in**

Romanticism Richard C. Sha, 2021-03-02 How did the idea of the imagination impact Romantic literature and science 2018 Winner Jean Pierre Barricelli Book Prize The International Conference on Romanticism Richard C Sha argues that scientific

understandings of the imagination indelibly shaped literary Romanticism Challenging the idea that the imagination found a home only on the side of the literary as a mental vehicle for transcending the worldly materials of the sciences Sha shows how imagination helped to operationalize both scientific and literary discovery Essentially the imagination forced writers to consider the difference between what was possible and impossible while thinking about how that difference could be known Sha examines how the imagination functioned within physics and chemistry in Percy Bysshe Shelley's Prometheus Unbound neurology in Blake's Vala or The Four Zoas physiology in Coleridge's Biographia Literaria and obstetrics and embryology in Mary Shelley's Frankenstein He also demonstrates how the imagination was called upon to do aesthetic and scientific work using primary examples taken from the work of scientists and philosophers Davy Dalton Faraday Priestley Kant Mary Somerville Oersted Marcet Smellie Swedenborg Blumenbach Buffon Erasmus Darwin and Von Baer among others Sha concludes that both fields benefited from thinking about how imagination could cooperate with reason but that this partnership was impossible unless imagination's penchant for fantasy could be contained

The Smallpox Report Fuson Wang, 2023-03-30 After the COVID 19 pandemic vaccination has become synonymous with an opaque biopower that legislates compulsory immunization at a distance Contemporary illness narratives have become outlets for distrust misinformation reckless denialism and selfish noncompliance In *The Smallpox Report* Fuson Wang rewinds this contemporary impasse between physician and patient back to the Romantic era origins of vaccination The book offers a literary historical account of smallpox vaccination contending that the disease's eventual eradication in 1980 was as much a triumph of the literary imagination as it was an achievement of medical Enlightenment science Wang traces our modern pandemic era crisis of vaccine hesitancy back to Edward Jenner's publication of his treatise on vaccination in 1798 the first rumblings of an anti vaccination movement and vaccination's formative literary history that included authors such as William Wordsworth William Blake John Keats Mary Shelley and Arthur Conan Doyle The book concludes with a re examination of the current deeply contentious public discourse about vaccines that has arisen in the wake of the COVID 19 pandemic By recovering the surprisingly literary genres of Romantic era medical writing *The Smallpox Report* models a new literary historical perspective on our own crises of vaccine refusal

Worm Work Janelle A.
