Secondhand Adam Minter, 2019-11-12 Revelatory terrifying but ultimately hopeful Elizabeth Kolbert Pulitzer Prize winning author of *THE SIXTH EXTINCTION* From the author of *Junkyard Planet* a journey into the surprising afterlives of our former possessions Downsizing Decluttering Discarding Sooner or later all of us are faced with things we no longer need or want But when we drop our old clothes and other items off at a local donation center where do they go Sometimes across the country or even halfway across the world to people and places who find value in what we leave behind In *Secondhand* journalist Adam Minter takes us on an unexpected adventure into the often hidden multibillion dollar industry of reuse thrift stores in the American Southwest to vintage shops in Tokyo flea markets in Southeast Asia to used goods enterprises in Ghana and more Along the way Minter meets the fascinating people who handle and profit from our rising tide of discarded stuff and asks a pressing question In a world that craves shiny and new is there room for it all *Secondhand* offers hopeful answers and hard truths A history of the stuff we've used and a contemplation of why we keep buying more it also reveals the marketing practices design failures and racial prejudices that push used items into landfills instead of new homes *Secondhand* shows us that it doesn't have to be this way and what really needs to change to build a sustainable future free of excess stuff

Responsible Product Innovation Andy Yunlong Zhu,Max von Zedtwitz,Dimitris G. Assimakopoulos,2017-11-09 This book analyses the relationships among product safety strategy and culture concurrent engineering new product development NPD processes and product safety performance Product safety is a matter of enormous economic and societal concern given the safety risks to consumers and the financial risks to producers Nevertheless a thorough conceptual understanding of the effects of NPD policies and practices is still largely missing as several large scale trends have made clarifying the role of product safety in its socio economic context difficult including the rise of consumerism and the shift in the balance of power from manufacturers to customers and regulators the internationalization of value chains and the fragmentation of markets worldwide and technological change leading to a sophistication of products that rendered average consumers increasingly unaware of risk and potential accidents This volume sets out to close the gaps among research practice and policy with an emphasis on advocating responsible product innovation Through an in depth study of the durable juvenile products industry the authors discover important relationships for example that top management involvement safety first culture and robust NPD processes are paramount in increasing product safety and decreasing product recalls in firms On the other end of the spectrum concurrent engineering does not automatically lead to product safety they found no magic bullet through which product safety can be tied to the use of a particular tool skill or practice Offering a dynamic framework for aligning the interests of multiple stakeholders including manufacturers regulators and consumers the authors provide a clearer understanding of product safety and its implications for scholars students policy makers and practitioners in the areas of innovation management product management R D management and responsible research and innovation
