*Parties as Governments in Eurasia, 1913-1991* Ivan Sablin, Egas Moniz Bandeira, 2022-08-15 This book examines the political parties which emerged on the territories of the former Ottoman Qing Russian and Habsburg empires and not only took over government power but merged with government itself It discusses how these parties disillusioned with previous constitutional and parliamentary reforms justified their takeovers with programs of controlled or supervised economic and social development including acting as the mediators between the various social and ethnic groups in the respective territories It pays special attention to nation building through the party to institutions both constitutional and de facto and to the global and comparative aspects of one party regimes It explores the origins of one party regimes in China Czechoslovakia

Korea the Soviet Union Turkey Yugoslavia and beyond the roles of socialism and nationalism in the parties approaches to development and state building as well the pedagogical aspirations of the ruling elites Hence by revisiting the dynamics of the transition from the earlier imperial formations via constitutionalism to one party governments and by assessing the internal and external dynamics of one party regimes after their establishment the book more precisely locates this type of regime within the contemporary world s political landscape Moreover it emphasises that one party regimes thrived on both sides of the Cold War and in some of the non aligned states and that although some state socialist one party regimes collapsed in 1989 1991 in other places historically dominant parties and new parties have continued to monopolize political power The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Security - Scope for Further EU Involvement? Great Britain: Parliament: House of Commons: Transport Committee, 2013-03-22 Last year the European Commission published a staff working document that was principally concerned with extending the Commission's involvement in transport security matters Land transport security measures seek to prevent acts of unlawful interference against passengers freight or transport infrastructure in the road and rail sectors Unlawful interference as referred to in the Commission's document includes anything from terrorism to relatively minor crime against passengers and transport operators The conflation of such wide ranging security issues is not helpful and the Government is urged to ensure that any future EU land security transport proposals are more focussed Overall the current risk based approach to land transport security in the UK are working well and security measures deployed across UK transport modes are proportionate to the current threats that any given sector is exposed to However some weaknesses in the UK's current land transport security regime were identified including for example procedures for dealing with multi modal transport hubs at which different threat levels are applied to different modes ensuring that staff had a consistent level of training and an understanding of potential threats risks and preventative measures and the difficulty of maintaining a high level of both staff and public vigilance The principal recommendation is that the Government should participate actively in EU discussions to ensure that any detailed proposals are focussed and appropriate to the UK Parliament should be kept abreast of developments so that we can continue to contribute to the shaping of policy in this area Department of Defense Authorization for Appropriations for Fiscal Year 2009 United States.
