Race, Racism, and Antiracism in Language Education Ryuko Kubota, Suhanthie Motha, 2024-10-30 Building on the pioneering 2009 volume *Race, Culture and Identities in Second Language Education*, this book reflects the significant expansion in the research since its publication and offers a wider breadth of perspectives on the complex theoretical terrain of race, racism and antiracism in language education. Contributors to this book apply a range of conceptual and methodological lenses to teaching diverse world languages. Underscoring the interconnectedness of race and colonialism, world language education and intersectional ideologies, this book offers a forum for engaged dialogues among teachers, teacher educators, teacher candidates, graduate and advanced undergraduate students, curriculum developers, policymakers and educational researchers in a wide range of disciplines including language education. In covering important theoretical frames and constructs including raciolinguistic and anti-oppressive pedagogies, decoloniality, neoliberalism and reverse linguistic stereotyping, this book breaks from the Global North norms in applied linguistics and language instruction. An essential text in TESOL and world language education, this volume weaves meaningful connections among language education, language in education policy and research.

Merging Numeracy with Literacy Practices for Equity in Multilingual Early Year Settings Robyn Jorgensen, Mellony Graven, 2022-01-01 This book draws on both in and out of school literacy practices with teachers and families to enhance the numeracy of early learners. It provides highly illustrative exemplars targeted for learners up to approximately eight years of age whose home language differs from the language of instruction. It identifies the challenges faced by these learners and their families and shares ways of building both literacy and numeracy skills for some of the vulnerable learners nationally and internationally. The book shares the outcomes and strategies for teaching mathematics to early years learners and highlights the importance of literacy practices for learners for whom the language of instruction is different from their home language. Readers will gain a practical sense of how to create contexts, classrooms and practices to scaffold these learners to build robust understandings of mathematics.

The History and Origin of Language A.S. Diamond, 2023-12-30 First Published in 1959. The history and origin of language deals with one of the most important and most fascinating subject matter of all human historical problems: that of the origin and development of language. It is the first attempt to solve it not by a priori methods but by marshalling and analyzing the whole of the evidence. It is a work of great originality by a scholar who has written other well known sociological works and the treatment is that of the sociologist. Dr Diamond writes for the intelligent layman as well as the linguist. He first seeks the true nature of language and its true function and structure in modern society and traces the paths along which language has developed and changed in its known history both in the forms of its words and in their meanings. Examining for this purpose many languages of civilized and primitive peoples. These paths he then pursues backwards with the aid of data from human physiology, the language of children and observations of animal behaviour and shows how all these paths converge to one beginning and deduces how language originated both the form of its first words and their meanings. He finally shows relics of these earliest words and meanings in languages which still survive. The arguments are cumulative and many sided and the case made is convincing. This is a must read for scholars and researchers of linguistics.

Crossing the Buffalo Adrian Greaves, 2012-06-28. A new and complete history of Zululand and its destruction at the hands of the British in 1879. This book is not only a complete history of the Zulus but also an account of the way the British won absolute rule in South Africa. In the early decades of the nineteenth century Shaka Zulu established a nation in south east Africa which was to become the most politically sophisticated and militarily powerful black nation in the entire area. Although the Zulus never had any quarrel with their British neighbours the rulers of the Cape Colony could not conceive of them as anything but a threat. In 1879 under dubious pretences the British finally crossed the Buffalo River and embarked on a bloody war that was to rock the very foundations of the British Empire. The story is studded with tales of incredible heroism, drama and atrocity on both sides: the Battle of Isandlwana where the Zulus inflicted on the British the worst defeat a modern army has ever suffered at the hands of men without guns; Rorke's Drift where a handful of British troops beat off thousands of Zulu warriors and won a record 11 VCs; and Ulundi where the Zulus were finally crushed in a battle that was to herald some of the most shameful episodes in British Colonial history. Comprehensive, vast in scope and filled with original and up to date research, this is a book that is set to replace all standard works on the subject.
