Resources in Education, 2001-04 **Mathematics and Science Curriculum Programs**, 2002 *Multidisciplinary Research in Arts, Science & Commerce (Volume-23)* Chief Editor- Biplab Auddya, Editor- Dr. N. Siddharthan, Dr. Akheel Mohammed, Zosangliani, Dr. Vani S V, Mr. Anand G. The Common Core State Standards have put close reading in the spotlight as never before. While middle and high school teachers want and need students to connect with, analyze and learn from both literary and informational texts, many are unsure how to foster the skills students must have in order to develop deep and nuanced understanding of complicated content. Is there a process to follow? How is close reading different from shared reading and other common literacy practices? How do you prepare students to have their ability to analyze complex texts measured by high stakes assessments? And how do you fit close reading instruction and experiences into an already crowded curriculum? Text complexity and how to determine if a particular text is right for your learning purposes and your students. The process and purpose of close reading with an emphasis on its role in developing the 21st century thinking, speaking and writing skills essential for academic communication and college and career readiness. How to plan, teach and manage close reading sessions across the academic disciplines, including the kinds of questions to ask, texts to use and supports to provide. How to assess close reading and help all students, regardless of linguistic, cultural or academic background, connect deeply with what they read and derive meaning from complex texts. Equipping students with the tools and process of close reading sets them on the road to becoming analytical and critical thinkers and empowered and independent learners. In this comprehensive resource you will find everything you need to start their journey.
