Cities' Identity Through Architecture and Arts Yasser Mahgoub, Nicola Cavalagli, Antonella Versaci, Hocine Bougdah, Marta Serra-Permanyer, 2020-11-28 This book covers a broad range of topics relating to architecture and urban design such as the conservation of cities culture and identity through design and planning processes various ideologies and approaches to achieving more sustainable cities while retaining their identities and strategies to help cities advertise themselves on the global market Every city has its own unique identity which is revealed

through its physical and visual form. It is seen through the eyes of its inhabitants and visitors and is where their collective memories are shaped. In turn, these factors affect tourism, education, culture, economic prosperity, in addition to other aspects, making a city's identity one of its main assets. Cities' identities are constructed and developed over time and are constantly evolving physically, culturally, and sociologically. This book explains how architecture and the arts can embody the historical, cultural, and economic characteristics of the city. It also demonstrates how cities' memories play a vital role in preserving their physical and nonphysical heritage. Furthermore, it examines the transformation of cities and urban cultures and investigates the various new approaches developed in contemporary arts and architecture. Given its scope, the book is a valuable resource for a variety of readers, including students, educators, researchers, and practitioners in the fields of city planning, urban design, architecture, and the arts.

What Is the Role for Effective Pedagogy In Contemporary Higher Education? Carl Senior, Dilly Fung, Christopher Howard, Rowena Senior, 2018-10-05. The number of students entering into Higher Education (HE) continues to grow, and as such, the sector now stands at the threshold of a major shift in its philosophy. No longer does the academic prerogative belong to a generation who valued learning for the sake of enlightenment. Many contemporary undergraduate students enter their programmes of study with a primary desire to improve their position on the subsequent employability market. Universities have been quick to meet this need, and institutional offerings have followed suit, enabling students to gain experience in a range of additional and subsidiary programmes that focus on the provision of value-added benefits. Here, students are encouraged to develop expertise in a range of topics from entrepreneurship and enterprise to intellectual property and even leadership skills. The first round of casualties that fall victim to such a shift are those programmes of study embedded within the humanities. As is evidenced by the falling numbers of enrolling students, the incoming cohort is less likely now to engage with such programmes, while participation in programmes that have a clear employability component has never been so high. To ensure that the HE sector continues to enable graduates to become effective citizens who contribute to the betterment of society, a range of general questions need to be addressed: What does it mean to be an authentic university in the modern era? What are the real student expectations of HE, and how are education providers framing and meeting these expectations? Is a new breed of academic leadership needed that will both meet the expectations of the students and guide the aspirations of academic staff? Finally, do we need an opportunity to reflect on the effective design and delivery of curriculum? Should the undergraduate student body play more of a role in the design of the curriculum, or should the undergraduate student body play more of a role in the design of the curriculum, or should they remain the recipients of a programme that has been designed by subject specialists? The scope of this book is wide, but it brings the design and delivery of higher education programmes under the empirical gaze of educational psychology. That is to say, all chapters centre on the impact of higher educational programmes on the student-teacher relationship, student learning, achievement, and identity. It is therefore crucial to explore the psychological impact of higher education institutions and how

these can then be used to inform innovative educational practice and policy
