Defining Identity and the Changing Scope of Culture in the Digital Age Novak, Alison, El-Burki, Imaani Jamillah, 2016-05-19 Since the popularization of Internet technologies in the mid 1990s human identity and collective culture has been dramatically shaped by our continued use of digital communication platforms and engagement with the digital world. Despite a plethora of scholarship on digital technology, questions remain regarding how these technologies impact personal identity and perceptions of global culture. *Defining Identity and the Changing Scope of Culture in the Digital Age* explores a multitude of topics pertaining to selfhood, self-expression, human interaction, and perceptions of civilization and culture in an age where technology has become integrated into every facet of our everyday lives. Highlighting issues of race, ethnicity, and gender in digital culture, interpersonal and computer-mediated communication, pop culture, social media, and the digitization of knowledge, this pivotal reference publication is designed for use by scholars, psychologists, sociologists, and graduate-level students interested in the fluid and rapidly evolving norms of identity and culture through digital media.

Comprehensive Membrane Science and Engineering Enrico Drioli, Lidieta Giorno, Enrica Fontananova, 2017-07-20 *Comprehensive Membrane Science and Engineering* Second Edition Four Volume Set is an interdisciplinary and innovative reference work on membrane science and technology. Written by leading researchers and industry professionals from a range of backgrounds, chapters elaborate on recent and future developments in the field of membrane science and explore how the field has advanced since the previous edition published in 2010. Chapters are written by academics and practitioners across a variety of fields including chemistry, chemical engineering, material science, physics, biology, and food science. Each volume covers a wide spectrum of applications and advanced technologies such as new membrane materials, e.g., thermally rearranged polymers, polymers of intrinsic microporosity, and new hydrophobic fluoropolymer, and processes, e.g., reverse electrodialysis, membrane contractors, membrane crystallization, membrane condenser, membrane dryers, and membrane emulsifiers that have only recently proved their full potential for industrial application. This work covers the latest advances in membrane science, linking fundamental research with real-life practical applications using specially selected case studies of medium and large-scale membrane operations to demonstrate successes and failures with a look to future developments in the field. Contains comprehensive cutting-edge coverage helping readers understand the latest theory. Offers readers a variety of perspectives on how membrane science and engineering research can be best applied in practice across a range of industries. Provides the theory behind the limits, advantages, future developments, and failure expectations of local membrane operations in emerging countries. *Advanced Technology in Exploration and Exploitation of Minerals 2nd* MEAI, 2014-01-01

Theorizing Teaching and Learning in Asia and Europe John Chi-Kin Lee, Kerry J. Kennedy, 2017-03-27 There has been much debate in recent times between the Anglo-American tradition of curriculum studies and the Continental and North European tradition of didactics. Didaktik. As important as such debate has been, this book seeks to add new voices to the

debate representing ideas and traditions from a different part of the world The focus is on Chinese curriculum thinking that has passed through a number of stages and currently represents a blend of some aspects of the American tradition and Chinese cultural traditions How does Chinese thinking about curriculum teaching and learning resonate with European didactic traditions and what are the implications for theorizing an expanded field of curriculum studies This book deliberately transcends borders and cultures to explore new territory to provide a platform for open dialogue and to open up new areas of investigation Chapters include Curriculum Reform and Research in China A Social Historical Perspective What Mathematics Did Teachers Learn Comparison of the School and the Pre Service Teacher Mathematics Curricula in Germany and Taiwan Living in Parallel Worlds A Transatlantic Dialogue between General Didactics and Instructional Design E-Waste in Transition Florin-Constantin Mihai, 2016-06-29 E waste management is a serious challenge across developed transition and developing countries because of the consumer society and the globalization process E waste is a fast growing waste stream which needs more attention of international organizations governments and local authorities in order to improve the current waste management practices The book reveals the pollution side of this waste stream with critical implications on the environment and public health and also it points out the resource side which must be further developed under the circular economy framework with respect to safety regulations In this context complicated patterns at the global scale emerge under legal and illegal e waste trades The linkages between developed and developing countries and key issues of e waste management sector are further examined in the book **On My Own** Xueli Wang, 2021-02-18 2020 ASHE Council for the Advancement of Higher Education Programs CAHEP Barbara Townsend Lecture Award 2021 Transfer Champion Catalyst Award from the National Institute for the Study of Transfer Students NISTS 2021 Outstanding Publication Award AERA Division J Publication and Research On My Own The Challenge and Promise of Building Equitable STEM Transfer Pathways is the first book of its kind to provide a detailed on the ground examination of the difficult paths curricular interpersonal and institutional that students must chart through community college The book follows 1 670 two year college students over four years as they begin STEM programs in the Midwest and documents their educational and life experiences as they moved toward or away from the prospect of transfer to a four year institution Their stories reveal that they were on their own left to navigate the pathways to transfer without meaningful institutional support The students pursued one of four pathways or momentum trajectories linear upward detoured deferred or taking a break The preexisting and lasting disparities in their access to education and financial resources their experiences with teaching and advising and the conundrum between support from and for family among others propelled them onto different trajectories in their quest for transfer As this book makes painfully clear the current state of transfer acts as a mechanism that perpetuates and worsens inequities in educational outcomes As Xueli Wang argues to cultivate an equitable STEM transfer pathway culturally relevant and responsive supports that are accessible welcoming and validating must be put in place at the institutional level and appeal to

the talent motivation and unique needs of historically marginalized students In doing so postsecondary institutions will be better positioned to fulfill their promise as an equitable pathway to bachelor s degrees and beyond Autonomous and Connected Heavy Vehicle Technology Rajalakshmi Krishnamurthi,Adarsh Kumar,Sukhpal Singh Gill,2022-01-18 Autonomous and Connected Heavy Vehicle Technology presents the fundamentals definitions technologies standards and future developments of autonomous and connected heavy vehicles This book provides insights into various issues pertaining to heavy vehicle technology and helps users develop solutions towards autonomous connected cognitive solutions through the convergence of Big Data IoT cloud computing and cognition analysis Various physical cyber physical and computational key points related to connected vehicles are covered along with concepts such as edge computing dynamic resource optimization engineering process methodology and future directions The book also contains a wide range of case studies that help to identify research problems and an analysis of the issues and synthesis solutions This essential resource for graduate level students from different engineering disciplines such as automotive and mechanical engineering computer science data science and business analytics combines both basic concepts and advanced level content from technical experts Covers state of the art developments and research in vehicle sensor technology vehicle communication technology convergence with emerging technologies and vehicle software and hardware integration Addresses challenges such as optimization real time control systems for distance and steering mechanism and cognitive and predictive analysis Provides complete product development commercial deployment technological and performing costs and scaling needs *Police in a Multicultural Society* David E. Barlow,Melissa Hickman Barlow,2018-04-10 Social political and economic relationships played key roles in the historical development of the police The authors present policing strategies from the vantage points of marginalized communities and emphasize the intersection of attitudes about class race ethnicity gender and sexual orientation with policies Police practices cannot be class neutral in a class society nor can they be race neutral or gender neutral in a racist sexist and heterosexist society The key to understanding the relationship between the police and society is to think critically about the role of power and interests The second edition includes a new chapter in the section on the police and rebellion covering recent events There is also a new chapter on Latino a police officers and an expanded chapter on LGBTQ police officers Without meaningful social change toward greater justice police reforms such as community policing and training in cultural diversity will fall short of creating an institution characterized by fairness and equality for all members of society A clear view of history is essential for understanding the challenges a more diverse police force faces in today s multicultural environment Child Development From Infancy to Adolescence Laura E.
