School Science Practical Work in Africa Umesh Ramnarain, 2020-06-01 School Science Practical Work in Africa presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning and the form of practical work that is strongly advocated is inquiry based learning which signals a definite paradigm shift from the traditional teacher dominated to a learner centered approach. The book provides empirical research on approaches to practical work, contextual factors in the enactment of practical work and professional development in teaching practical work. This book will be of great interest to academics, researchers and post graduate students in the fields of science education and educational policy.

Report Series: Committee on Astronomy and Astrophysics National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Space Studies Board, Committee on Astronomy and Astrophysics, 2017-06-08. The 2010 astronomy and astrophysics decadal survey *New Worlds New Horizons in Astronomy and Astrophysics* laid out an exciting portfolio of recommended activities to guide the agencies research programs over the period 2012-2021. The newly constituted Committee on Astronomy and Astrophysics (CAA) is tasked with monitoring the progress of the survey's recommended priorities. The CAA met in conjunction with Space Science Week 2017 in Washington D C on March 28-30, 2017. This was the first meeting at which the CAA could produce a report and in advance of that meeting the CAA received a question from NASA about an upcoming Small Explorer (SMEX) mission call. This report addresses whether there may or may not be sufficient compelling science motivations for a SMEX sized mission to justify a SMEX Announcement of Opportunity (AO) in 2018 or 2019 as is currently planned.

On Chester On Graeme J. White, 2014. Although there has been a University of Chester only since 2005 its predecessor Chester College dates back further than most UK universities to 1839. This book celebrates the 175th anniversary of the foundation in 2014. The story is a remarkable one of survival and success. The early College was a pioneering venture with a unique approach to learning and the University still houses the first buildings in England specifically designed for the training of teachers. Three times in the 1860s, the 1930s and the 1970s Chester College came near to closure only repeatedly to emerge intact and to become stronger than before. In the early twenty first century the University has a growing reputation within the higher education sector and can claim some of the highest rates of student satisfaction in the country. The book's title is taken from the College motto of the late Victorian and Edwardian period as appropriate today as when it was coined: Show More Show Less.
