Sara E Spruce, Professor of Education, Olivet Nazarene University. Use this research based instructional model to meet students achievement goals. As the achievement gap between advantaged and disadvantaged students gets wider, teachers and administrators need a proven process to help all students meet the requirements of NCLB. This practitioner friendly guidebook provides a step by step approach to a complete standards based curriculum and the integration of best practices into the delivery and assessment of instruction in every classroom. The authors present three capacity building features of the design process: 1 training for building leadership teams to help teachers plan and lead the reform process; 2 stewardship training to assist district administrators and principals in supporting and sustaining the implemented reforms; and 3 a collaborative observation process to help teachers work together and in partnership with principals to monitor and improve classroom instruction. Offering an education model that has been field tested with more than 50 school districts in the U S and Canada, this book shows school leaders how to maximize collaborative observation and other team leadership processes to integrate reforms into a school's existing culture. Educators will learn ways to integrate instructional design with successful instructional reform. Strengthen the learning culture through standards. Develop effective performance indicators. Disengaged learners that have no say in their coerced curriculum tend to act out, tune out, or drop out. Education must change, and unschooling is the fastest growing alternative method of learning. Two decades ago, students registered with their local school based on their house address. Now, with the internet, students are borderless. Learning can occur anywhere, anytime, anyway, and from anyone, including self-taught. Self-directing their education, unschoolers learn through Play, Projects, Reading, Volunteering, Video games, Sports, Mentorship, Travel, Life. This book explores the path of 30 unschooled children who

self directed all or part of their education and were accepted by universities colleges and other postsecondary schools Most have already graduated What children need most are close relationships parents teachers siblings relatives coaches and mentors within a wider community not just within an institutional school Educational content is everywhere Caring relationships are not Families that embrace unschooling do not have to choose between a quality education and a relaxed connected family lifestyle They can have both
