Experts, 2019-09-06 *Policing Cities* Randy K Lippert, Kevin Walby, 2013-07-18 *Policing Cities* brings together international
scholars from numerous disciplines to examine urban policing securitization and regulation in nine countries and the
conceptual issues these practices raise Chapters cover many of the world's major cities including New York Beijing Paris
London Berlin Mexico City Johannesburg Rio de Janeiro Boston Melbourne and Toronto as well as other urban areas in
Britain United States South Africa Germany Australia and Georgia The collection examines the activities and reforms of the
traditional public police but also those of emerging public and private policing agents and spaces that fall outside the public

police's purview and which previously have received little attention. It explores dramatic changes in public policing arrangements and strategies, exclusion of urban homeless people, new forms of urban surveillance and legal regulation and securitization and militarization of urban spaces. The core argument in the volume is that cities are more than mere background for policing, securitization and regulation. Policing and the city are intimately intertwined. This collection also reveals commonalities in the empirical interests, methodological preferences and theoretical concerns of scholars working in these various disciplines and breaks down barriers among them. This is the first collection on urban policing, regulation and securitization with such a multi-disciplinary and international character. This collection will have a wide readership among upper-level undergraduate and graduate-level students in several disciplines and countries and can be used in geography, urban studies, legal and socio-legal studies, sociology, anthropology, political science and criminology courses.

Inequality and the 1% Danny Dorling, 2014-10-07. Since the Great Recession hit in 2008, the 1% has only grown richer while the rest find life increasingly tough. The gap between the haves and the have-nots has turned into a chasm. While the rich have found new ways of protecting their wealth, everyone else has suffered the penalties of austerity. But inequality is more than just economics. Being born outside the 1% has a dramatic impact on a person's potential, reducing life expectancy, limiting educational and work prospects, and even affecting mental health. What is to be done? In *Inequality and the 1%*, leading social thinker Danny Dorling lays bare the extent and true cost of the division in our society and asks what have the super-rich ever done for us. He shows that it is the 1% that threatens us with the most harm and why we must urgently redress the balance.

The Complacent Class Tyler Cowen, 2017-02-28 A Wall Street Journal and Washington Post Bestseller Tyler Cowen's blog Marginal Revolution is the first thing I read every morning And his brilliant new book The Complacent Class has been on my nightstand after I devoured it in one sitting I am at round the clock Cowen saturation right now Malcolm Gladwell Since Alexis de Tocqueville restlessness has been accepted as a signature American trait Our willingness to move take risks and adapt to change have produced a dynamic economy and a tradition of innovation from Ben Franklin to Steve Jobs The problem according to legendary blogger economist and best selling author Tyler Cowen is that Americans today have broken from this tradition we're working harder than ever to avoid change We're moving residences less marrying people more like ourselves and choosing our music and our mates based on algorithms that wall us off from anything that might be too new or too different Match.com matches us in love Spotify and Pandora match us in music Facebook matches us to just about everything else Of course this matching culture brings tremendous positives music we like partners who make us happy neighbors who want the same things We're more comfortable But according to Cowen there are significant collateral downsides attending this comfort among them heightened inequality and segregation and decreased incentives to innovate and create The Complacent Class argues that this cannot go on forever We are postponing change due to our near sightedness and extreme desire for comfort but ultimately this will make change when it comes harder The forces unleashed by the Great Stagnation will eventually lead to a major fiscal and budgetary crisis impossibly expensive rentals for our most attractive cities worsening of residential segregation and a decline in our work ethic The only way to avoid this difficult future is for Americans to force themselves out of their comfortable slumber to embrace their restless tradition again
