Mair, 1993-11-17 Japanese carmaker Honda has pioneered a new breed of multinational enterprise true manufacturing at the global scale Honda has been a leader in confounding predictions that Japan's carmakers would and could never transfer their success abroad and that a wholesale Japanization of the west would be provoked if they did The book covers manufacture research and development sourcing of components human resources and labour relations collaboration with western firms political controversy and the role of concepts and ideas in

Japan North America and Europe **Information Agglomeration of Japanese Auto Parts Suppliers** Yosuke Takeda, Ichihiko Uchida, 2024-09-14 This book explains information agglomeration a new concept we devise under the influence of Hidalgo 2015 Our concept of information agglomeration applies to an economy with horizontal divisions while an ordinary concept of industry agglomeration means spillover effects of corporate firms on another ones in vertically integrated industries In a horizontally divided economy of a society in which the capacities of individuals greatly surpass their individual knowledge as Hidalgo 2015 envisages the combinatorial creativity emerges from our species ability to crystallize imagination Consequently it is likely that information agglomerates in such knowledge oriented economies We take the Japanese auto parts suppliers for example The production system in which highly modularized products are crafted by skilled labors and multipurpose machines was called flexible specialization instead of mass production by Piore and Sabel 1984 However the conventional economics of transaction costs pioneered by Ronald Coase and Oliver Williamson suggests that it is costly for dispersed organizational networks to make and sustain creational links to accumulate vast volumes of knowledge information We wonder what has made information agglomeration possible for the Japanese auto parts suppliers with the flexible specialization What has lowered the transaction costs associated with the organizational links We consider what causes the information agglomeration to amplify in the supply chains constructing economic models of some hypotheses on the driving forces of information agglomeration and utilizing firm level and establish level micro data to empirically test these hypotheses Finally based on the empirical evidence on information agglomeration we shed light on whither fast evolving automobile manufacturing in Japan that autonomous driving technology is likely to exert traction on **Frameworks and Cases on Evolutional Supply Chain** Higuchi, Toru, 2022-04-29 Although most supply chains have changed dramatically over the years the dynamic aspects of supply chains such as changes in the suppliers factory and storage locations production processes and distribution structures are rarely studied and considered Further study on the evolution of supply chains is crucial in order to ensure they are working as efficiently as possible Frameworks and Cases on Evolutional Supply Chain considers the dynamic aspects of the supply chain and provides frameworks of the evolutional supply chain through symbolic case studies Covering a range of topics such as industrial clusters food loss and the global supply chain this reference work is ideal for industry professionals researchers practitioners scholars academicians policymakers business owners government officials instructors and students *Kiplinger's Personal Finance* ,1976-09 The most trustworthy source of information available today on savings and investments taxes money management home ownership and many other personal finance topics
