Kendzior, 2017-09-18 When watching the evening news you can be led to believe that most slip and fall claims are bogus and nothing more than a scam designed to fleece business owners and the insurance industry for money But not all Plaintiffs are scam artists and not all victims are seeking to cash in on their injury Falls can affect each of us The next victim could be your mother your brother your spouse or child and oh yes even you The truth of the matter is each year millions of personal injury lawsuits are filed by victims of a slip trip and fall accidents most of which are settled out of court However over the past decade there has been a noticeable rise in the average settlement as well as jury verdicts As an expert witness Russell J Kendzior has been retained in more than 700 slip trip and fall lawsuits and has now compiled over 50 of his top cases in *Floored* Rather than debate the truth behind slip trip and fall litigation Kendzior sets the record straight and provides the reader with a behind the curtain view of the people filing these lawsuits and the companies being sued This book is a great resource that explains what can be done to prevent the injury and thus the lawsuit through the eyes of a safety expert and stories of real world victims      **Macroeconomics** Paul R. *At what Cost* Nicholas Freudenberg, 2021 An incisive and powerful investigation of corporate impact on human and planetary well being Freedom of choice lies at the heart of American society Every day individuals decide what to eat which doctors to see who to connect with online and where to educate their children Yet many Americans don't realize that these choices are illusory at best By the start of the 21st century every major industrial sector in the global economy was controlled by no more than five transnational corporations and in about a third of these sectors a single company accounted for more than 40 percent of global sales The available options in food healthcare education transportation and even online presence are largely constructed by corporations whose sweeping influence have made them the public face and executive agents of 21st century capitalism At What Cost confronts how globalization financial speculation monopolies and control of science and technology have enhanced the ability of corporations and their allies to overwhelm influences of government family community and faith As corporations manipulate demand through skillful marketing and veto the choices that undermine their bottom line free consumer choice has all but disappeared and with it the personal protections guarding our collective health At What Cost argues that the world created by 21st century capitalism is simply not fit to solve our most serious public health problems from climate change to opioid addiction However author and public health expert Nicholas Freudenberg also shows that though the road is steep human and planetary well being constitute a powerful mobilizing idea for a new social movement one that will restore the power of individual voice to our democracy With impeccably detailed research and an eye towards a better future At What Cost arms ordinary citizens activists and health professionals with an understanding of how we've arrived at the precipice and what we can do to ensure a healthier collective future

his position within the Islamic community if he does in fact perform as offered While practically everyone believes the assassin is dead a very corrupt F B I acting director and a woman who thinks she may be in love with the assassin are not so sure and both try to find him for their very different reasons      Leadership and Business Ethics Gabriel Flynn,2008-07-17

This book points to a necessary relationship between ethics and business the success of such an alliance depends directly on sound business leadership Without the sort of leadership that upholds the dignity and rights of employees and clients as well as the interests of shareholders even the most meticulously prepared ethics statements are destined to founder as evidenced at Enron and elsewhere Over the past 30 years or so since business ethics became established as a discipline in its own right much progress has been made in the ethical conduct of business at all levels In short business people like politicians doctors and church leaders have come to realize that it is not possible to avoid involvement in ethics for much of what business people do and cannot do may be subject to ethical evaluation While the history of business ethics as currently practised may be traced to the medieval and ancient periods our principal concern is with developments in the eld over recent decades A consideration of how the topic has been treated by the Harvard Business Review the business world

sleadingprofessionaljournal provideshelpful insights into past progress and present challenges In 1929 just as business ethics was beginning to evolve Wallace B      **"Should Obama Be Impeached?"** Thomas R. Meinders,2011-05-06 Should Obama Be Impeached The United States of America is currently in three wars What the American people would like to know is why we engaged in any of them since the President of the United States doesnt make a commitment to winning them The President has stated that we would start withdrawing troops from Afghanistan within a few months If we are going to withdraw the troops in a few months without any hope of winning the war it makes more sense to withdraw them immediately The Taliban is just waiting for the troops to withdraw The Taliban already knows that they have won the war The President needs to make the commitment to win the war or get out now This is a huge waste of the resources of the United States with no hope for a positive outcome If the President is going to have a plan to win the war then he needs to discuss it with the Generals in charge The President does not know who we are fighting or why When Obama was asked who the rebels are in Libya there was complete silence Why are we there when no one knows who we are supporting Then the President has made comments that Gadhafi must go Then in the next sentence Obama states that we will not target Gadhafi with the air strikes The President can not have it both ways Either eliminate Gadhafi and his leaders or forget about winning this war When you cut off the head of the dog the rest of the dog is going to stop functioning This does not seem like a very hard decision to make Get serious about winning or get out of the game      **Sustainable Supply Chains** Tonya Boone,Vaidyanathan Jayaraman,Ram Ganeshan,2012-06-07 A sustainable enterprise is one that contributes to sustainable development by simultaneously delivering economic social and environmental benefits or what has been termed the triple bottom line While pursuing profit socially responsible companies should be sensitive to the environment and uphold the

**Urban Meltdown** Clive Doucet, 2009-03-01

Stopping global warming isn't about better planning it's about politics Modern Political Economics Yanis

Varoufakis, Joseph Halevi, Nicholas Theocarakis, 2012-03-29 Once in a while the world astonishes itself Anxious incredulity replaces intellectual torpor and a puzzled public strains its antennae in every possible direction desperately seeking explanations for the causes and nature of what just hit it 2008 was such a moment Not only did the financial system collapse and send the real economy into a tailspin but it also revealed the great gulf separating economics from a very real capitalism Modern Political Economics has a single aim To help readers make sense of how 2008 came about and what the post 2008 world has in store The book is divided into two parts The first part delves into every major economic theory from Aristotle to the present with a determination to discover clues of what went wrong in 2008 The main finding is that all economic theory is inherently flawed Any system of ideas whose purpose is to describe capitalism in mathematical or engineering terms leads to inevitable logical inconsistency an inherent error that stands between us and a decent grasp of capitalist reality The only scientific truth about capitalism is its radical indeterminacy a condition which makes it impossible to use science's tools e.g calculus and statistics to second guess it The second part casts an attentive eye on the post war era on the breeding ground of the Crash of 2008 It distinguishes between two major post war phases The Global Plan 1947 1971 and the Global Minotaur

1971 2008 This dynamic new book delves into every major economic theory and maps out meticulously the trajectory that global capitalism followed from post war almost centrally planned stability to designed disintegration in the 1970s to an intentional magnification of unsustainable imbalances in the 1980s and finally to the most spectacular privatisation of money in the 1990s and beyond Modern Political Economics is essential reading for Economics students and anyone seeking a better understanding of the 2008 economic crash      **Environmental Law Dimensions of Human Rights** Ben Boer,2015-03-12

**Anthropology and Contemporary Human Problems** John H. Bodley, 2012-04-12 We live in a time of global mega problems of unsustainable growth and consumption resource depletion ecosystem degradation global warming escalating energy costs poverty and conflict Cultural anthropologist John H Bodley trenchantly critiques these most pressing issues and shows how anthropology makes it possible to find solutions The focus on culture scale suggests that many solutions may be found by developing local communities supported by regional markets and ecosystems rather than by making the continuous accumulation of financial capital the dominant cultural process throughout the world Now in its sixth edition this classic textbook continues to have tremendous relevance and is more timely than ever in light of the recent global economic crisis It exposes readers to the problems of a world out of balance with misdirected growth by the elite Bodley offers examples from prehistoric and modern tribal societies along side of ancient imperial and contemporary commercial societies Students will find this to be the trusted source to build a world view Anthropology and Contemporary Human Problems is ideal for adoption in anthropology and sociology courses on globalization cultural ecology social class and inequality the environment sustainability and development

*Plan C* Pat Murphy, 2008-06-01 Concerns over climate change and energy depletion are increasing exponentially Mainstream solutions still assume a panacea that will cure our climate ills without requiring any serious modification to our way of life Plan C explores the risks inherent in trying to continue our energy intensive lifestyle Using dirtier fossil fuels Plan A or switching to renewable energy sources Plan B allows people to remain complacent in the face of potential global catastrophe Dramatic lifestyle change is the only way to begin to create a sustainable equitable world The converging crises of Peak Oil Climate Change and increasing inequity are presented in a clear concise manner as are the twin solutions of community where cooperation replaces competition and curtailment deliberately reducing consumption of consumer goods Plan C shows how each person's individual choices can dramatically reduce CO2 emissions It offers specific strategies in the areas of food transportation and housing One chapter analyzes the decimation of the Cuban economy when the USSR stopped oil exports in 1990 and provides an inspiring vision for a low energy way of living Plan C is an indispensable resource for anyone interested in living a lower energy saner and sustainable lifestyle
