Corporate Disasters: Gale, Cengage Learning, 2017-04-21 Corporate Disasters What Went Wrong and Why profiles the biggest corporate mistakes or misdeeds throughout history covering the people the times the decisions made This volume covers Management and Leadership Failures Each essay puts the business and its operators in the context of its own time explaining the market social and technology forces at play and each explores the key make or break decisions that led to disaster *Financial Disclosure Report of Members of the Board of the Office of Congressional Ethics* United States. Congress. House. Office of Congressional Ethics. Board, 2013 **Automotive Global Value Chain** Wilson Kia Onn Wong, 2017-08-09 Today some suppliers have grown increasingly powerful and in certain cases earn revenues that rival or even exceed that of their automaker clients In the pre globalisation period automakers wielded absolute power over their significantly smaller suppliers This book reveals the upending of this relationship with the gradual shift in the balance of power from automakers to their suppliers in this era of globalisation The book examines how suppliers in the global tyres seats constant velocity joints hereafter CVJs braking systems and automotive semiconductor industries have evolved into powerful oligopolies through a mix of acquisition and organic growth strategies It also highlights how joint ventures could be strategically deployed as springboards to acquisition as they enable firms to familiarise themselves with their partners markets and operations Moreover the book analyses the disruption stirred by the entry of well resourced technology titans into this industry and their inevitable clash with the traditional incumbents This book is an invaluable reference for anyone interested in learning more about the automakers and now their suppliers relentless quest to create market dominating intelligent driving systems **Financialisation in the Automotive Industry** Marcelo José do Carmo, Mário Sacomano Neto, Julio Cesar Donadone, 2021-07-08 Where presidents or members of affluent families were previously seen it is increasingly the case that car manufacturers are owned by banks and investment funds which have taken control of the entire economic life of these firms This has significant impact on the terms of employment and layoffs wages and precarious work growing inequalities in income strata compensation levels for executives and the implementation of short termist strategies across business operations This book explores this increasing financialisation the predominance of the financial sector over the productive sector in the automotive industry In particular it is shown that the financial operations of these companies through leasing insurance loans and other financial instruments is now much more profitable than the manufacturing aspects of the business which was originally the *raison d'être* for these firms The chapters demonstrate how there are great demands to increase the return to shareholders as a main concern despite other metrics and or other stakeholders The work studies the impact of financialisation at the world's five largest automakers which together represent almost 50% of car production providing an exploratory analysis of profitability shareholder composition compensation to executives workers salaries dividend payments to shareholders and employment Encouraging debate on contemporary

economy this book marks a significant addition to the literature on financialisation contemporary forms of capitalism labour and economic sociology more broadly

**The Entrepreneurial State** Mariana Mazzucato, 2024-02-06 Award winning economist Mariana Mazzucato's famously incisive international bestseller debunking the pervasive myth of the inept state versus an innovative private sector with a new preface by the author According to conventional wisdom innovation is best left to the bold entrepreneurs of the private sector and government should get out of the way But what if that wasn't the case What if from the inventions of Silicon Valley to medical breakthroughs the public sector has actually been the most courageous and valuable risk taker of all Critically acclaimed and influential thinker and scholar Mariana Mazzucato argues comprehensively against the myth of a lumbering bureaucratic state versus a dynamic innovative private sector with remarkable original and deep research In a series of case studies from nanotechnology to the emerging green tech of today Mazzucato reveals that the opposite is true the private sector only finds the courage to invest after an entrepreneurial state has made the high risk investments The Entrepreneurial State reveals how every technology that makes the iPhone so smart was actually funded by the government from the Internet and GPS technology to touch screen displays and voice activated Siri In the history of modern capitalism the State has not only fixed market failures but has also actively shaped and created markets In doing so it sometimes wins and sometimes fails Yet by not admitting the State's role in active risk taking we've created an innovation system where the public sector socializes risks while privatizing reward as Mazzucato controversially argues This bold and provocative book considers how we adopted this dysfunctional dynamic and then how we can overcome it so that economic growth can be not only smart but inclusive as well

**Creating Social Value** Cheryl Kiser, Deborah Leipziger, J. Janelle Shubert, 2017-09-08 There is a new business landscape where companies are increasingly being judged on their ability to generate \_social value\_ But there is no off the shelf solution for the leaders and change makers in this new domain Creating social value is a journey and each company must chart its own path through uncertain and complex terrain We invite you to discover how the entrepreneurial leaders profiled in this book have become trailblazers using strategy and innovation to generate profits and social value simultaneously Creating Social Value provides insights into the motivations and preoccupations of groundbreaking entrepreneurial leaders as they look to activate change not just within their companies but also in their sectors value chains and even through co creating partnerships with their competitors Such change requires fundamentally new styles of leadership and business design where companies seek to be generative rather than extractive This book also bears witness to the emergence of new language to describe these innovative concepts Working with and sharing ideas with social entrepreneurs and entrepreneurs inside the authors became aware of the building blocks of a new lexicon with the power to inspire and positively influence the culture of an organization Many of the leaders included in this book have driven change by harnessing the power of language to reroute their company's direction For example The Campbell Soup Company has created \_destination goals\_ to describe the long term vision of the company to nourish its

customers employees and neighbours Roshan has worked on \_nation building\_ creating physical infrastructure in Afghanistan a country decimated by war UPS has worked to understand its impact on the planet building a \_materiality matrix\_ of the issues that matter to its stakeholders while working to create a culture that fosters social innovation and seeks to understand \_constructive dissatisfaction\_ Ford is redefining its mission imagining a different future in which it provides \_mobility solutions\_ rather than only manufacturing cars Ford is working with Toyota to co create technologies to combat climate change This book sets out a manifesto for Social Value Creation which is defined as a strategy that combines a unique set of corporate assets including innovation capacities marketing skills managerial acumen employee engagement scale in collaboration with the assets of other sectors and firms to co create breakthrough solutions to complex economic social and environmental issues that impact the sustainability of both business and society Social innovation differs from corporate responsibility in two significant ways it is strategic and it leverages a wide range of corporate assets and core competencies Creating Social Value has been designed as a manual for change It will be essential reading for business students entrepreneurs and all of those wishing to effect positive generative change in larger organizations

### **Aligning for Advantage**

Thomas C. Lawton,Jonathan P. Doh,Tazeeb Rajwani,2014-02-27 In today s multipolar world economy strategic alignment is a key determinant of competitive advantage Coca Cola Danone Diageo DuPont Lufthansa and Tata are some of the companies that strive for a pragmatic approach to balancing competitive strategies with political and social obligations Aligning for Advantage argues that to build and sustain corporate success companies must synchronize business objectives and market positions with political and regulatory activism and social and environmental engagement Moreover to be credible and realizable these external market and nonmarket strategies need to be equally attuned with corporate vision values and culture The book advances a managerial process and conceptual framework for aligning corporate strategy In some cases alignment may mean deep strategically embedded partnerships with governments NGOs or other stakeholders In others alignment may take the form of looser temporary collaborations with outside organizations No matter the approach the relationship between nonmarket and market strategies should be deliberate and genuine not accidental or artificial Truly aligned strategies should reconcile and modulate sometimes conflicting external demands in a way that is appropriate for the corporation s geographic and market positions In the end companies must leverage their overall nonmarket strategy as a source of competitive advantage

### **Hollowed Out**

David Madland,2015-06-24 For the past several decades politicians and economists thought that high levels of inequality were good for the economy But because America s middle class is now so weak the US economy suffers from the kinds of problems that plague less developed countries As Hollowed Out explains to have strong sustainable growth the economy needs to work for everyone and expand from the middle out This new thinking has the potential to supplant trickle down economics the theory that was so wrong about inequality and our economy and shape economic policymaking for generations

### **Overcoming Barriers to Electric-Vehicle Deployment**

Board on Energy and Environmental Systems,Division on Engineering and Physical Sciences,Transportation Research Board,2013-07-02 The

electric vehicle offers many promises increasing U S energy security by reducing petroleum dependence contributing to climate change initiatives by decreasing greenhouse gas GHG emissions stimulating long term economic growth through the development of new technologies and industries and improving public health by improving local air quality There are however substantial technical social and economic barriers to widespread adoption of electric vehicles including vehicle cost small driving range long charging times and the need for a charging infrastructure In addition people are unfamiliar with electric vehicles are uncertain about their costs and benefits and have diverse needs that current electric vehicles might not meet Although a person might derive some personal benefits from ownership the costs of achieving the social benefits such as reduced GHG emissions are borne largely by the people who purchase the vehicles Given the recognized barriers to electric vehicle adoption Congress asked the Department of Energy DOE to commission a study by the National Academies to address market barriers that are slowing the purchase of electric vehicles and hindering the deployment of supporting infrastructure As a result of the request the National Research Council NRC a part of the National Academies appointed the Committee on Overcoming Barriers to Electric Vehicle Deployment This committee documented their findings in two reports a short interim report focused on near term options and a final comprehensive report *Overcoming Barriers to Electric Vehicle Deployment* fulfills the request for the short interim report that addresses specifically the following issues infrastructure needs for electric vehicles barriers to deploying the infrastructure and possible roles of the federal government in overcoming the barriers This report also includes an initial discussion of the pros and cons of the possible roles This interim report does not address the committee s full statement of task and does not offer any recommendations because the committee is still in its early stages of data gathering The committee will continue to gather and review information and conduct analyses through late spring 2014 and will issue its final report in late summer 2014 *Overcoming Barriers to Electric Vehicle Deployment* focuses on the light duty vehicle sector in the United States and restricts its discussion of electric vehicles to plug in electric vehicles PEVs which include battery electric vehicles BEVs and plug in hybrid electric vehicles PHEVs The common feature of these vehicles is that their batteries are charged by being plugged into the electric grid BEVs differ from PHEVs because they operate solely on electricity stored in a battery that is there is no other power source PHEVs have internal combustion engines that can supplement the electric power train Although this report considers PEVs generally the committee recognizes that there are fundamental differences between PHEVs and BEVs
